

# HAVANA BROWN

The Havana Brown has an unique look due to its distinctive muzzle shape, unique colour and its large, forward tilted ears. It is a highly intelligent cat showing a great desire for human companionship and attention.

## I – BODY/CONFORMATION (30)

(10) BODY – Body should be medium in length, firm and muscular.

(5) NECK – Neck should be medium in length, in proportion with the body.

(10) LEGS & FEET – Legs and feet are proportionate with the body. Hind legs are slightly higher. Paws are oval.

(5) TAIL – Medium in length, slender, neither whip-like nor blunt, tapered at the end.

## II – HEAD TYPE (30)

(5) FULL FACE – The head should be longer than it is wide, narrowing to a rounded muzzle with a whisker break.

(10) PROFILE – In profile, there is a distinct stop at the eyes. The end of the muzzle appears almost square. This illusion is heightened by the well-developed chin, the profile outline of which is more square than round.

(5) WHISKERS – Brown, being the same shade as the coat.

(5) EARS – Large, round and tipped with very little hair inside or out. Ears are widely set but do not flare. They are pricked slightly forward.

(5) EYES – The eyes are oval in shape.

## III – COAT TEXTURE/LENGTH (10)

The coat is medium in length, smooth and lustrous.

## IV – COLOUR (20)

(15) COLOUR – A shade of rich, warm mahogany brown. Entire coat should be the same sound shade of brown to the skin. Nose leather must have a rosy tone. Paw pads are pinkish rose in colour.

(5) EYE COLOUR – Should be chartreuse green with a darker, even green preferred.

## V – CONDITION & BALANCE (10)

The cat when viewed as a whole, gives a totally well balance appearance. Coat must be glossy. Eyes must be clear.

## OBJECTIONS

DEDUCT
