

BRITISH

LONGHAIRS AND SHORTHAIRES ARE JUDGED AS TWO SEPARATE BREEDS.

The British breed is broad shouldered, muscular and powerful. It shows good depth of body with solid weight and strong, short legs. Paws are firm and rounded. The head is broad and round set on a short, solid neck. Medium rounded ears set far apart on the head with cheeks that are full and contribute to the round appearance of the head. The eyes are large and round giving a wide-awake appearance.

I – BODY/CONFORMATION (30)

(20) **BODY** – Cobby with level back. Broad, deep chest. Equally massive across shoulders and hips, Medium to large in size, but not rangy.

(5) **LEGS & FEET** – Low on legs which are strong and well proportioned. Paws are round and firm.

(5) **TAIL** – Thick at base with a rounded tip. Medium in length and in proportion with the body.

II – HEAD TYPE (30)

(15) **HEAD** – Round face with full cheeks. Good breadth of the skull with round underlying bone structure. Head to be on a short, thick neck. A rounded forehead leads to a short, broad and straight nose. The nose break is neither too pronounced nor too shallow. The tip of the chin lines up with the tip of the nose in the same vertical plane.

(5) **EARS** – Medium with rounded tips. Set far apart and fits into, without distorting, the rounded contours of the head. Inner ear perpendicular to the eye.

(10) **EYES** – Large, round and well opened, with no tendency to oriental shape. Set wide apart. Eye colour is to conform to the requirements listed in coat colour description.

III – COAT TEXTURE/LENGTH (10)

SHORTHAIR — The coat is short, dense, crisp and resilient.

LONGHAIR — The coat is medium long, smooth and very dense, with sufficient undercoat. It shall be crisp and not lying flat, it shall stand off from the body. The hair will not be too long and not be flowing. A ruff and ‘knickerbockers’ are desirable. The tail shall be bushy, well furnished and full to emphasize the cat’s beauty. The texture is rather rough, crisp, but softer than that in British Shorthair. The coat texture may be different to touch in other colours than in the colour blue.

IV – COLOUR (20)

Solid coloured cats are eligible for 20 points on colour alone. Non-solid coloured (patterned) cats are eligible for 10 points for colour and 10 points for pattern. Shadow tabby markings on solid coloured kittens are not a fault.

V – CONDITION & BALANCE (10)

Hard and muscular with no indication of fat. Alert appearance.

BI-COLOUR

The bi-colour pattern consists of a coat of colour/pattern with the addition of white. Ideally the 4 paws and legs, belly and chest are white, with white on the face and chin.

The occurrence of **blue-eyed or odd-eyed* bi-colour cats** is allowed.

Within the British breed only the blue eye/copper odd-eyed combination is allowed. To assign the eye colour, substitute the first letter 'X' (which appears below) with either 'Y' for blue-eyed OR 'Z' for odd-eyed* colour. (i.e., **Black & White Blue-eyed colour code would be 005M**Y**X while the code for **Black & White Odd-eyed** would be 005M**Z**X).*

CALICO

Calico pattern is composed of large separate spots of 2 different colours—one of which must be red or cream—on a white cat.

The occurrence of **blue-eyed or odd-eyed* calico cats** is allowed. **Within the British breed only the blue eye/copper odd-eyed combination is allowed. To assign the eye colour, substitute the first letter 'X' (which appears below) with either 'Y' for blue-eyed OR 'Z' for odd-eyed* colour. (i.e., the colour code for a Calico Blue-eyed would be 019YXX or a Calico Odd-eyed would be 019ZXX)*

PATTERNED CALICO is a tri-colour pattern which has spots of tabby markings instead of solid colour spots (excluding the red/cream spots) on the white base coat. No tabby pattern description required. Example: Dilute Calico Patterned = a white cat with blue tabby markings instead of solid blue spots and separate solid red/cream spots (Note: tabby markings in the red/cream spots are ignored).
