

## BRITISH

### LONGHAIRS AND SHORTHAIRES ARE JUDGED AS TWO SEPARATE BREEDS.

The British breed is broad shouldered, muscular and powerful. It shows good depth of body with solid weight and strong, short legs. Paws are firm and rounded. The head is broad and round set on a short, solid neck. Medium rounded ears set far apart on the head with cheeks that are full and contribute to the round appearance of the head. The eyes are large and round giving a wide-awake appearance.

### I – BODY/CONFORMATION (30)

(20) BODY – Cobby with level back. Broad, deep chest. Equally massive across shoulders and hips, Medium to large in size, but not rangy.

(5) LEGS & FEET – Low on legs which are strong and well proportioned. Paws are round and firm.

(5) TAIL – Thick at base with a rounded tip. Medium in length and in proportion with the body.

### II – HEAD TYPE (30)

(15) HEAD – Round face with full cheeks. Good breadth of the skull with round underlying bone structure. Head to be on a short, thick neck. A rounded forehead leads to a short, broad and straight nose. The nose break is neither too pronounced nor too shallow. The tip of the chin lines up with the tip of the nose in the same vertical plane.

(5) EARS – Medium with rounded tips. Set far apart and fits into, without distorting, the rounded contours of the head. Inner ear perpendicular to the outer edge of eye.

(10) EYES – Large, round and well opened, with no tendency to oriental shape. Set wide apart. Eye colour is to conform to the requirements listed in coat colour description.

### III – COAT TEXTURE/LENGTH (10)

**SHORTHAIR** — The coat is short, dense, crisp and resilient.

**LONGHAIR** — The coat is medium long, smooth and very dense, with sufficient undercoat. It shall be crisp and not lying flat, it shall stand off from the body. The hair will not be too long and not be flowing. A ruff and ‘knickerbockers’ are desirable. The tail shall be bushy, well furnished and full to emphasize the cat’s beauty. The texture is rather rough, crisp, but softer than that in British Shorthair. The coat texture may be different to touch in other colours than in the colour blue.

### IV – COLOUR (20)

Solid coloured cats are eligible for 20 points on colour alone. Non-solid coloured (patterned) cats are eligible for 10 points for colour and 10 points for pattern. Shadow tabby markings on solid coloured kittens are not a fault.

### V – CONDITION & BALANCE (10)

Hard and muscular with no indication of fat. Alert appearance.

### OBJECTIONS

- \* Weak chin.
- \* Rangy body.

## SHADED

### GENERAL DESCRIPTION

**Coat:** White undercoat (Goldens have a rich warm honey cream undercoat.). Coat on back, flanks, head, and tail sufficiently tipped with an established colour or pattern from dark on the ridge to white (or cream for Goldens) on the chin, chest, stomach, and under the tail. Shaded cats are darker (greater amount of pigment on tips/hair shaft) than Chinchillas (or Shells). Legs to be the same tone as face. Preference should be given to the cat whose coat lacks tabby markings.

**Nose Leather:** Conform to the established colour standards.

**Paw Pads:** Conform to the established colour standards.

**Eye Colour:** Silver Shaded and Golden Shaded have green or blue-green eyes.

## FLAXEN GOLDEN (Shaded & Chinchilla)

The accepted norm of the established base colour/pattern combined with the lightening modifier known as Flaxen Golden.

### GENERAL DESCRIPTION

**Coat:** The back and flanks appear in accordance with the basic colour/pattern. Along the throat, neck, chest, abdomen, and groin there is a strip of pale to very pale milky-creamy flaxen shade which blends into the contrasting golden part. The contrast with the base tone is more obvious when a greater degree of lightening is present. There may be a warmer tone to the abdomen.

The inner side of the legs ranges from a warm flaxen to pale milky-creamy flaxen shade. The outer side of the forelimbs below the elbow may be variable, but a symmetrical degree of lightening is desirable. At the maximum, only a narrow golden stripe above toes is visible on a pale creamy background. At the minimum, only the toe tips are lightened. The outer side of the hind legs below the hock has a golden tone or pronounced tipping depending on the base colour/pattern.

**ALLOWANCES:** The lightened flaxen shade on pale pigments (i.e., lilac, fawn) may appear almost white. There is significantly less pigment tipping on a flaxen golden chinchilla than there is on the traditional golden chinchilla. The flaxen golden tone tends to be much

warmer and brighter than the traditional golden coat colour.

**Nose:** Colour of nose leather is pink. The nose leather outline is absent or incomplete. The muzzle is a milky-creamy flaxen shade. There is a pale triangular shape above the nose leather blending into the golden (flaxen) cranial coat colour.

**Paw Pads:** Conforms to the established colour standards, but may not be fully pigmented.

**Eye Colour:** Hazel (yellow-green), green to blue-green.

*In the absence of lightening on the chest and belly and minimal lightening of the toe tips, the cat is judged in accordance with the main base Golden colour **NOT Flaxen Golden**.*

### BLUE SHADED

**Coat:** White undercoat. The coat on the back, flanks, head, and tail sufficiently tipped with blue, from dark on the ridge to white on the chin, stomach and chest, and under the tail. ## TABBY PATTERNS

### CLASSIC TABBY PATTERN

Markings dense, clearly defined and broad. Legs barred with bracelets. Tail evenly ringed ending in a dark tip. Necklaces on neck and upper chest are to be unbroken. Frown marks on forehead form a letter "M". Unbroken line runs back from outer corner of eye. Swirls on cheeks. Vertical lines over back of head extend to shoulder markings which are in the shape of a butterfly with both upper and lower wings distinctly outlined and marked with dots inside the outline. Back markings consist of a vertical line down the spine from butterfly to tail with a vertical stripe paralleling it on each side. Large solid blotch on each side to be encircled by one or more unbroken rings. Side markings should be the same on both sides. Double vertical rows of buttons on chest and stomach. Hocks to be same colour as markings.

### MACKEREL TABBY PATTERN

## GENERAL PREFACE

It is important to consult the individual breed standard for breed-specific disqualifications. The following list applies to all breeds unless otherwise indicated.

### WITHHOLD AWARDS (W/A) FOR:

- More or fewer than five toes on each front paw and four toes on each back paw. Pixie-Bobs are exempt from this disqualification.
- White lockets, buttons, or toes on any cat, except where part of the natural colour or pattern, or unless otherwise specified in the breed standard.
- Any entry that is declawed. Clear nail-tip covers are allowed.
- Any deformity or disfigurement — hereditary, congenital, or acquired. Household Pet entries are exempt from this disqualification.
- A cat showing evidence of intent to deceive (e.g., the presence of powder or chalk residue in the coat after normal grooming; the use of tints, colour rinses, or other artificial colouring concealment media; sanding or shaving).
- An entry, without provocation, attacks a judge or other person within the ring area, the entry shall be deemed vicious and disqualified (D.V. Disqualified, Vicious).
- Kinks, visible or invisible. Kink is defined as a rigid deflection of the tail line, whether visible or not. Small, invisible bumps or calcium deposits shall be considered a fault. Refer to individual breed standards for exceptions to this rule.
- Wrong eye colour (unless otherwise specified in a breed's standard).
- Crossed eyes in any breed. Household Pet entries are exempt from this disqualification.
- Maloccluded jaws.
- Monorchidism (the absence of one testicle) or cryptorchidism (the absence of both testicles) is grounds for withholding awards in the Championship (whole adult) or Miscellaneous (whole adult) classes.
- Any entry that scores less than 90 points.
- Excellence in one aspect of the standard shall not offset a deficiency in another. Because the standard specifically describes the various parts of the cat's appearance, all judges shall conduct their judging in accordance with these specifications.
- All entries should possess the appropriate weight, condition, and balance for their breed. Balance is the overall physical picture of the cat. The cat must 'fit together', and no single quality **should** be emphasized. Judges shall not penalize any fault by more than the cat would have earned if perfect in that detail.
- Judges shall penalize or disqualify N.F.A (No Further Award) for poor condition, indicating illness or poor care.
- If an entry has fleas, fungus, ear mites, etc., the judge shall N.F.A. the entry and notify the Show Manager.
- An obviously pregnant or lactating queen will be disqualified as N.F.A. (No Further Awards).
- Natural lighting should be used wherever possible. Allowances should be made for harsh artificial lighting, which may distort eye and coat colour.
- An entry presented in the judging ring showing noticeable effects of a sedative (e.g., third eyelids visible, overly glassy eyes, inability to stand or sit, lack of coordination or muscle control) shall not receive an award. The judge will record N.F.A (No Further Award) in their judge's book.
- Any cat too nervous or intractable to handle by the judge or the owner / agent must be disqualified (D.U.H. – Disqualified, Unable to Handle).
- A judge may disqualify any entry whose owner / agent draws specific attention to himself or his entry when benching the cat in the judging ring or at any time during judging. Judges shall enter D.L.E. (Disqualified, Lack of Etiquette) in their books.
- When an entry's colour or pattern has been misclassified, the entry shall be transferred to its correct class with the owner's permission.
- Cats recovering from recent surgery (or injury) where the incision (or wound) has not completely healed, stitches removed, etc.; must be disqualified (N.F.A. – No Further Awards).

### FACTORS TO CONSIDER:

- A weak, receding, or protruding chin is considered a serious fault. Deductions can be made for chin, profile, and balance.
- Allowance should be made for stud jowls in males. Usually, males are proportionally larger than females.
- Allowance is to be made for seasonal variations in coat.
- Allowance should be made for faint tabby markings in kittens and young cats, except when they are part of the normal colour pattern.
- Allowance should be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.
