

# CORNISH REX

The Cornish Rex is a cat covered in a characteristic soft, wavy curly-coat, with a fine-boned body that stands high on its legs. It's a well-balanced cat physically and in temperament. It has a distinctive arched back, deep rib cage and a natural 'tuck-up.' It's distinguished by its slender and graceful appearance. The fine bone conformation is covered with firm muscles so when handling, it feels hard and surprisingly weighty. The coat quality and texture, distinctive head type, refined boning as well as a 'well knit' body are prime features to examine.

## I – BODY/CONFORMATION (25)

(14) BODY – Small to medium in size. Slender and fine boned but still hard and muscular. All contours gently curved and without any tubular appearance (5 points). Due to the generally strong and well-developed musculature, all heavily muscled areas appear somewhat heavy in proportion to rest of body. Rib cage is full and deep (3 points). Naturally arched back, an arch is evident when the cat is standing naturally. Lower line of the body follows this upward curve, showing tuck-up (6 points).

(3) NECK – Long and slender.

(5) LEGS & FEET – Except for the more muscular hips, the legs are very long, delicate and slender. Stands high on its legs. When viewed from behind, back legs show no evidence of being splayed or "cow-hocked". Paws dainty and slightly oval in shape.

(3) TAIL – Long and slender, tapering toward end and extremely flexible. A slight natural curve of the last vertebrae is not a fault.

## II – HEAD TYPE (25)

(5) HEAD SHAPE – Egg shaped, oval and relatively small compared with rest of body; length is nearly 1/3 greater than width.

(5) FRONT VIEW – Head appears to be a smooth reunion (at the whisker break) of two circles. Muzzle well defined with a definite whisker break. Whiskers and eyebrows are curly. All outlines are gently curved.

(5) PROFILE – Rounded forehead, Roman-type nose and high, prominent bridge give impression the head profile consists of two convex arcs which meet at nose break. Nose break is smooth and mild but distinctive. Strong, chin, well-developed forming a straight line with tip of nose giving depth and 'strength' in appearance rather than 'receding' in appearance.

(5) EARS – Large, wide at base, tapering to rounded tips, taller than wide, placed high on head and stand erect (as if listening), with outer edges nearly parallel and continuing a straight line from each jowl. Ears may be bare.

(5) EYES – Set one full eye's width apart. Medium to large in size, oval in shape and possess a slight upward slant. Eye colour is clear and brilliant, with any colour permitted.

## III – COAT TEXTURE/LENGTH (40)

(10) Extremely soft, silky and completely free of coarse guard hair.

(5) Short and dense, but evenly distributed without any thin or sparse areas.

(5) Closely lying to body and any open coat is undesirable.

(20) A distinctive, tight, uniform marcel wave. Size and depth of wave may vary from cat to cat. Waves should extend from top of head, across back, sides, thighs and continue to tip of tail. Some allowance should be made for thin coat or bare patches on the tail.

## IV – COLOUR (5)

Any coat colour, or combination of colours, or patterns is permitted. Solid colour cats with white lockets, spots, buttons, groin spots, or toes shall remain in the solid colour class (no penalty is applied). EYE COLOUR is clear and brilliant, with any colour permitted.

## V – CONDITION & BALANCE (5)

Fine boned and muscular. Excellent physical condition.

## CARAMELIZED (Dilute Modifier)

Caramel is a 'dilute modifier' that affects diluted colours (Blue, Lilac, Fawn, Cream): Blue (based) Caramel, Lilac (based) Caramel, Fawn (based) Caramel. Apricot is the name used for Cream (based) Caramel. A metallic sheen visibly overlays the base coat colour. Carmelized colours are recognized in all dilute colours and patterns including with white.

## WITH WHITE COMBINATIONS

### Bi-Colour Combinations:

All established colours and patterns **with the addition of white** (preferred minimum the cat should have white feet, legs, undersides, chest, and muzzle—ideally an inverted 'V'). All eye colours are allowed including odd-eyed (one eye must be blue): Solids, Smokes, Shadeds, Chinchillas, Golden Shadeds, Golden Chinchillas, Tabbies, Silver Tabbies, Golden Tabbies, Patched Tabbies, Silver Patched Tabbies, Golden Patched

Tabbies, Tortoiseshells, Tortoiseshell Smokes, Tortoiseshell Shaded, Tortoiseshell Chinchillas, Tortoiseshell Golden Shaded, Tortoiseshell Golden Chinchillas. All eye colours are allowed including Odd-eyed (one eye must be blue).

#### **Calico Combinations:**

All established colours and patterns distributed as described for the Calico pattern (a tri-colour cat with un-brindled medium to large patches of SOLID colour and red, or DILUTE colour and cream on a white background). Calico, Dilute Calico, Calico Smoke, Calico Shaded, Calico Chinchilla, Calico Golden Shaded, Calico Golden Chinchilla, Tabby Patterned Calico, Tabby Patterned Silver Calico, Tabby Patterned Golden Calico. All eye colours are allowed including Odd-eyed (one eye must be blue).

#### **Van Combinations:**

All established colours and patterns distributed as described for the Van pattern (face and body predominantly white with colour restricted to the head and tail. One or two small spots of colour on the body are allowed): Solids, Smokes, Shaded, Chinchillas, Golden Shaded, Golden Chinchillas, Tabbies, Silver Tabbies, Golden Tabbies, Patched Tabbies, Silver Patched Tabbies, Golden Patched Tabbies, Tortoiseshells, Tortoiseshell Smokes, Tortoiseshell Shaded, Tortoiseshell Chinchillas, Tortoiseshell Golden Shaded, Tortoiseshell Golden Chinchillas, and all Calico patterns. All eye colours are allowed including Odd-eyed (one eye must be blue).

## **SEPIA and MINK**

Sepia and Mink colours are recognized in all established colours and patterns (except Pointed); including with white (bi-colour, calico, van).

**Sepia** eye colour is gold or greenish-gold, and odd-eyed (one blue eye and one gold or greenish-gold eye). Sepia coat colour is paler and warmer than the equivalent of traditional colour. The coat colour darkens with age. A slight intensification of colour at the ears, tail, feet and face is noticeable especially in kittens.

**Mink** eye colour is blue-green to aqua, and odd-eyed (one blue eye and one blue-green / aqua eye). Mink coat colour is much lighter than the corresponding sepia colours and develops more intense colour at the ears, tail, feet and face; than on the body.

Sepia and Mink are recognized in: Solids (except black\* and white), Smokes, Shaded, Chinchillas, Golden Shaded, Golden Chinchillas, Tabbies, Silver Tabbies, Golden Tabbies, Patched Tabbies, Silver Patched Tabbies, Golden Patched Tabbies, Tortoiseshells, Tortoiseshell Smokes, Tortoiseshell Shaded, Tortoiseshell Chinchillas, Tortoiseshell Golden Shaded, Tortoiseshell Golden Chinchillas. All established colours and patterns with the addition of white: Bi-Colours, Calicos, and Vans.

*\*The Sepia and Mink equivalent of Black is SEAL.*

# SMOKE

## GENERAL DESCRIPTION

**Coat:** Deeply tipped with an established colour or pattern. In repose the cat looks like the established colour or pattern, In motion the white undercoat is clearly apparent. The face, ears, legs, and tail are the established colour or pattern with a narrow band of white at the base of the hairs next to the skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

**Nose leather:** Conform to the established colour standards.

**Paw Pads:** Conform to the established colour standards.

**NOTE:** *During seasonal coat colour changes on both kittens and adults, the “reverse” colour of the coat is to be considered a NORMAL coat colour change. At the root it may appear that the primary smoke colour turns white a short distance up the hair shaft and then reverts back to the primary colour. The tipping during this coat colour phase may consume most of the hair shaft with only minimal white colour deep in the coat.*

***Refer to Breed Standard and General Preface for disqualifications and objections not listed here.***

Traditional eye colour is copper, gold, green, or hazel. Eye colour may differ from the norm, please refer to the individual breed standard for additional guidance.

## ANY COLOUR WITH WHITE

Coat conforms to the established colours and patterns with the addition of white. As a preferred minimum (unless otherwise stated in the breed standard), the cat should have white feet, legs, underside, chest and muzzle. An inverted 'V' on the face is desirable. Nose leather and paw pads conform to the established colour standards. Eye colour is gold to copper, blue, green, hazel, or odd-eyed (one blue and one gold/copper eye with equal colour depth). Shaded silver and white, chinchilla silver and white, shaded golden and white, chinchilla golden and white may also have green, blue-green, or odd-eyed where one eye is green or blue-green and the other is blue with equal colour depth.

## CALICO / DILUTE CALICO

All established colours and patterns distributed as described for the Calico pattern (a tri-colour cat with un-brindled medium to large patches of DENSE colour and red, or DILUTE colour and cream on a white background). All eye colours are allowed including Odd-eyed (one eye must be blue).

## PATTERNED CALICO

### PATTERNED CALICO

**Coat:** A white cat with TABBY patterned patches of established colours with patches of RED (which may or may not be tabby). As a preferred minimum (unless otherwise stated in the breed standard) the cat should have white feet, legs, underside, chest and muzzle.

**Nose Leather:** Pink or the established colour.

**Paw Pads:** Pink, or the established colour.

### DILUTE PATTERNED CALICO

**Coat:** A white cat with TABBY patterned patches of established colours with patches of CREAM (which may or may not be tabby). As a preferred minimum (unless otherwise stated in the breed standard), the cat should have white feet, legs, underside, chest and muzzle.

**Nose Leather:** Pink or the established colour.

**Paw Pads:** Pink, or the established colour.

## Van Combinations:

All established colours and patterns distributed as described for the Van pattern (face and body predominantly white with colour restricted to the head and tail. One or two small spots of colour on the body are allowed): All eye colours are allowed including Odd-eyed (one eye must be blue).

## CARAMEL

Caramel is a 'dilute modifier' that affects diluted colours (Blue, Lilac, Fawn, Cream): Blue (based) Caramel, Lilac (based) Caramel, Fawn (based) Caramel. Apricot is the name used for Cream (based) Caramel. The dilute modifying gene does not affect the coat colour of Red cats.

*Carmelized colours are recognized in all dilute colours and patterns including with white.*

**Blue Caramel** is medium to dark brownish blue with a purplish cast. Paw pads and nose leather are any shade of taupe with purplish over tone. Should display a metallic sheen especially on the head, up the hocks and around the paw pads. Less evident in kittens.

**Lilac Caramel** is a cool toned lilac with rich honey brown overtones. Paw pads and nose leather are any shade of taupe with purplish over tone. Should display a metallic sheen especially on the head, up the hocks and around the paw pads. Less evident in kittens.

**Fawn Caramel** is a warm pale cinnamon with soft blue overtones. Paw pads and nose leather are any shade of taupe with purplish over tone. Should display a metallic sheen especially on the head, up the hocks and around the paw pads. Less evident in kittens.

**Apricot** (Cream Caramel) is an intense hot pinkish cream. Paw pads and nose leather are pink. Should display a metallic sheen especially on the head, up the hocks and around the paw pads. Less evident in kittens.

## SEPIA and MINK

Sepia and Mink colours are recognized in all established colours and patterns (except Pointed); including with white (bi-colour, calico, van).

*The Sepia and Mink equivalent of Black is Seal.*

**Sepia:** eye colour is gold or greenish-gold, and odd-eyed (one blue eye and one gold or greenish-gold eye). Sepia coat colour is paler and warmer than the equivalent of traditional colour. The coat colour darkens with age. A slight intensification of colour at the ears, tail, feet and face is noticeable especially in kittens.

**Mink:** eye colour is blue-green to aqua, and odd-eyed (one blue eye and one blue-green / aqua eye). Mink coat colour is much lighter than the corresponding sepia colours and develops more intense colour at the ears, tail, feet and face; than on the body.

Please refer to the individual breed standard for description of markings.

## **POINTED WITH WHITE**

**Pointed with White** should conform to the pointed pattern with the addition of white overlaid. The face and the body should exhibit substantial white (a minimum of one-third is preferred). There must be some white on the face with enough white to indicate an inverted ‘V’ being preferred. Small to medium spots of colour are allowed within the white, both on the face and on the body. Blue eye colour. Disqualify no white on face.

## **POINTED VAN**

**Pointed Van** should conform to the pointed pattern with the face and the body exhibiting substantial white (a minimum of one-third is preferred). Point colour is confined to the head and tail with some allowance of point colour on the legs. There must be enough white on the face to differentiate the Van pattern from an inverted ‘V’ of a bi-colour. One or two small spots of colour are allowed within the white, both on the face and on the body. Blue eye colour. Disqualify no white on face.

## GENERAL PREFACE

It is important to consult the individual breed standard for breed-specific disqualifications. The following list applies to all breeds unless otherwise indicated.

### WITHHOLD AWARDS (W/A) FOR:

- More or fewer than five toes on each front paw and four toes on each back paw. Pixie-Bobs are exempt from this disqualification.
- White lockets, buttons, or toes on any cat, except where part of the natural colour or pattern, or unless otherwise specified in the breed standard.
- Any entry that is declawed. Clear nail-tip covers are allowed.
- Any deformity or disfigurement — hereditary, congenital, or acquired. Household Pet entries are exempt from this disqualification.
- A cat showing evidence of intent to deceive (e.g., the presence of powder or chalk residue in the coat after normal grooming; the use of tints, colour rinses, or other artificial colouring concealment media; sanding or shaving).
- An entry, without provocation, attacks a judge or other person within the ring area, the entry shall be deemed vicious and disqualified (D.V. Disqualified, Vicious).
- Kinks, visible or invisible. Kink is defined as a rigid deflection of the tail line, whether visible or not. Small, invisible bumps or calcium deposits shall be considered a fault. Refer to individual breed standards for exceptions to this rule.
- Wrong eye colour (unless otherwise specified in a breed's standard).
- Crossed eyes in any breed. Household Pet entries are exempt from this disqualification.
- Maloccluded jaws.
- Monorchidism (the absence of one testicle) or cryptorchidism (the absence of both testicles) is grounds for withholding awards in the Championship (whole adult) or Miscellaneous (whole adult) classes.
- Any entry that scores less than 90 points.
- Excellence in one aspect of the standard shall not offset a deficiency in another. Because the standard specifically describes the various parts of the cat's appearance, all judges shall conduct their judging in accordance with these specifications.
- All entries should possess the appropriate weight, condition, and balance for their breed. Balance is the overall physical picture of the cat. The cat must 'fit together', and no single quality **should** be emphasized. Judges shall not penalize any fault by more than the cat would have earned if perfect in that detail.
- Judges shall penalize or disqualify N.F.A (No Further Award) for poor condition, indicating illness or poor care.
- If an entry has fleas, fungus, ear mites, etc., the judge shall N.F.A. the entry and notify the Show Manager.
- An obviously pregnant or lactating queen will be disqualified as N.F.A. (No Further Awards).
- Natural lighting should be used wherever possible. Allowances should be made for harsh artificial lighting, which may distort eye and coat colour.
- An entry presented in the judging ring showing noticeable effects of a sedative (e.g., third eyelids visible, overly glassy eyes, inability to stand or sit, lack of coordination or muscle control) shall not receive an award. The judge will record N.F.A (No Further Award) in their judge's book.
- Any cat too nervous or intractable to handle by the judge or the owner / agent must be disqualified (D.U.H. – Disqualified, Unable to Handle).
- A judge may disqualify any entry whose owner / agent draws specific attention to himself or his entry when benching the cat in the judging ring or at any time during judging. Judges shall enter D.L.E. (Disqualified, Lack of Etiquette) in their books.
- When an entry's colour or pattern has been misclassified, the entry shall be transferred to its correct class with the owner's permission.
- Cats recovering from recent surgery (or injury) where the incision (or wound) has not completely healed, stitches removed, etc.; must be disqualified (N.F.A. – No Further Awards).

### FACTORS TO CONSIDER:

- A weak, receding, or protruding chin is considered a serious fault. Deductions can be made for chin, profile, and balance.
- Allowance should be made for stud jowls in males. Usually, males are proportionally larger than females.
- Allowance is to be made for seasonal variations in coat.
- Allowance should be made for faint tabby markings in kittens and young cats, except when they are part of the normal colour pattern.
- Allowance should be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.
