

EXOTIC

LONGHAIRS AND SHORTHAIRES ARE JUDGED AS TWO SEPARATE BREEDS.

The Exotic Shorthair displays all the attributes of the Persian except the lack of a long flowing coat. The Exotic Longhair displays all the attributes of the Persian. Exotics were developed by crossing Persians with American Shorthairs. Like the Persian, the Exotic has a compact, short-legged build with a short, pushed in face. From the American Shorthair the Exotic Shorthair gained the shorter coat, which is, however, much thicker and somewhat longer than that of other shorthair breeds.

I – BODY/CONFORMATION (20)

(5) SHAPE – Cobby body type. Exotics are low on the legs, deep in chest, equally massive across the shoulder and rump, with a short well rounded thorax and abdomen.

(5) SIZE – Medium to large in size. Quality is to be considered over size.

(5) LEGS – Legs are short, thick and strong. Straight forelegs. Paws are large, round and firm. Toes are carried close.

(5) TAIL – Tail is short, but in proportion with body length.

II – HEAD TYPE (40)

(5) SKULL – The skull is round and massive with great breadth. The face is round with round underlying bone structure. The skull is well set on a short neck. The doming or forehead should be smooth to the feel with no lumps and have a rounded appearance from the side. Smoothness of the forehead/doming is paramount.

(5) PROFILE — From the side, the face should appear flat with neither the nose nor muzzle being prominent. Nose should not be indented inward past the vertical plane. Forehead should round outwards and not have a flat plain. Eyes should not bulge unduly past the vertical plain.

(5) NOSE – Short, snub and broad nose with a decided break between the eyes.

(5) CHEEKS – Cheeks are full.

(5) JAWS – Jaws are broad and powerful.

(5) CHIN – Chin is full and well developed.

(5) EARS – Ears are small, round tipped, tilted forward and not unduly open at the base. Ears are set far apart and low on the head. They fit into the rounded contour of the head.

(5) EYES – Eyes are large, round and full. They are set far apart and appear brilliant. Eyes are alert and sweet. Eye colour is to conform with coat colour. Preference is given to depth, brilliance and evenness of eye colour.

III – COAT TEXTURE/LENGTH (20)

SHORTHAIRES: Coat is dense, plush, soft in texture, full of life and stands out from the body due to the density. Coat is not flat or close lying. It is medium length, slightly longer than in other short haired cats, but not long enough to flow. Fur on the tail should not lie flat and should stand away from the tailbone resembling a bottle brush in appearance.

LONGHAIR: The coat should be long, fine in texture, glossy, full of life and should stand off from the body. Ruff should be immense and continue in a deep frill between the front legs. The ear tufts are long and curved. Toe tufts are long. The tail plume is very full.

IV – COLOUR (10)

Points for cats with special markings or patterns should be divided into 5 points for colour and 5 points for markings.

V – CONDITION & BALANCE (10)

The overall condition of the cat is firm without being fat. The cat when viewed as a whole gives a totally well-balanced round appearance. Excellence in one aspect shall not offset deficiency in another aspect.

OBJECTIONS

DEDUCT

* Large pointed ears.	1-3
* Small or almond shape eyes.	1-3
* Weak eye colour.	1-3
* Delicate bone structure.	2-5
* Flat or close lying coat.	2-5
* Closed nostrils, tiny pinhole nostrils and or breathing through the mouth.	2-5
Nostrils not large enough to breathe through.	

WITHHOLDS

- * White lockets or buttons.
- * In pointed cats, eye colour other than blue.
- * Lack of nose break.
- * All grounds for withholding awards as listed in the General Preface.

RECOGNIZED COLOURS

Refer to Colours & Patterns appendix for complete list.

BREED ORIGIN:	Hybrid
REGISTRATION REQUIREMENTS:	F1 allowed
SHOWING REQUIREMENTS:	F1 allowed.
ALLOWED ANCESTRY:	Exotic (LH & SH), Persian, American SH (May 1, 2010) Himalayan, Non-Pointed Himalayan
ALLOWED MATINGS:	Exotic (LH & SH), Persian, Himalayan, Non-Pointed Himalayan

TORTOISESHELL

BLUE CREAM	013XXX
CHOCOLATE TORTOISESHELL	014XXX
LILAC CREAM	015XXX
TORTOISESHELL	012XXX

The smoke series of the above tortoiseshell colours is listed in the Smoke/Shaded/Chinchilla/Shell listing.

BI-COLOUR

The bi-colour pattern consists of a coat of colour/pattern with the addition of white. Ideally the 4 paws and legs, belly and chest are white, with white on the face and chin.

The occurrence of **blue-eyed or odd-eyed* bi-colour cats** is allowed. **To assign the eye colour, substitute** the first letter 'X' (which appears below) with either 'Y' for blue-eyed OR 'Z' for odd-eyed* colour. (i.e., **Black & White Blue-eyed** colour code would be 005MYX while the code for **Black & White Odd-eyed** would be 005MZ~~X~~).

CALICO

Calico pattern is composed of large separate spots of 2 different colours—one of which must be red or cream—on a white cat.

The occurrence of **blue-eyed or odd-eyed* calico cats** is allowed. **To assign the eye colour, substitute** the first letter 'X' (which appears below) with either 'Y' for blue-eyed OR 'Z' for odd-eyed* colour. (i.e., the colour code for a **Calico Blue-eyed** would be 019YXX or a **Calico Odd-eyed** would be 019ZXX)

LILAC CALICO CHINCHILLA	120AXX

PATTERNED CALICO is a calico with **tabby markings** which **must** be seen in the non-red/cream colour areas (i.e., separate brown tabby areas and separate red/cream areas on a white cat) in order to qualify as a **Patterned Calico**. Cats which have tabby markings appearing ONLY in the red or cream patches should be registered as a normal Calico based on the colour combinations. The occurrence of **blue-eyed or odd-eyed* bi-colour cats** is allowed. **To assign the eye colour, substitute** the first letter 'X' (which appears below) with either 'Y' for blue-eyed OR 'Z' for odd-eyed* colour. (i.e., **Brown Calico & White Blue-eyed** colour code would be 120SYX while the code for **Brown Calico & White Odd-eyed** would be 120SZX).

(separate lilac silver tabby areas & cream silver areas on white cat)	

VAN

The Van pattern consists of a **WHITE** cat with colour restricted to the head and tail. One or two small spots of colour on the body allowed.

The occurrence of **blue-eyed or odd-eyed* Van pattern cats** is allowed. **To assign the eye colour, substitute** the first letter 'X' (which appears below) with either 'Y' for blue-eyed OR 'Z' for odd-eyed* colour. (i.e., the colour code for a **Black Van Blue-eyed** would be 005LYX and a **Black Van Odd-eyed** would be 005LZX)
