

FOLDEX

LONGHAIRS AND SHORTHAIRES ARE JUDGED AS TWO SEPARATE BREEDS.

The Foldex breed is a man-made breed and was established by mating the Scottish Fold and the Exotic. The Foldex blends the physical features of the two parent breeds in moderation, creating a cat which has a sweet open 'owl-like' expression with a moderate fold to its ears.

I – BODY/CONFORMATION (35)

(15) BODY – Medium in size, compact, well-developed musculature, medium to heavy boning. Wide chest, rather low on its legs, with well-proportioned overall appearance.

(10) LEGS & PAWS – Legs strong, short, well developed muscles and forelegs straight. Paws rounded and firm. Toes close together, not splayed, five in front and four in back.

(10) TAIL – Medium, in proportion with the length of the body, thick and FLEXIBLE.

II – HEAD TYPE (40)

(10) SHAPE – Broad skull, round and massive head and rounded forehead. Cheeks are prominent on the female and full on the male. Short muzzle, powerful jaws, maxillaries reflecting proper bite. The neck is short and powerful with good muscle tone blending into shoulders.

(10) EARS – Small with rounded tip. Ears have a single fold forward in a downward direction. a 90 degree angle is permitted but ear cannot be folded tight against the head in a cap-like fashion Ears are set far apart and low on the head.

(10) EYES – Large, round, set far apart, wide open producing a sweet expression. Eye colour is to correspond with coat colour.

(10) NOSE – Short broad nose with a definite break but NOT to exceed 90 degrees. Open nostrils.

III – COAT TEXTURE/LENGTH (10)

SHORTHAIK – Short, plush, even, soft and silky in texture, sufficiently dense to stand out from the body including the tail.

LONGHAIR – Medium to long hair, soft, glossy, full of life, standing out from the body due to its density. The tail plume is full.

IV – COLOUR (5)

All colours and patterns, and combinations are accepted.

V – CONDITION & BALANCE (10)

The ideal Foldex leaves the impression of an alert and healthy cat. A balanced cat will show a harmony of design throughout. Nothing is extreme in this breed, all features are moderate.

SMOKE

GENERAL DESCRIPTION

Coat: Deeply tipped with an established colour or pattern. In repose the cat looks like the established colour or pattern, In motion the white undercoat is clearly apparent. The face, ears, legs, and tail are the established colour or pattern with a narrow band of white at the base of the hairs next to the skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose leather: Conform to the established colour standards.

Paw Pads: Conform to the established colour standards.

Eye Colour: Copper.

NOTE: During seasonal coat colour changes on both kittens and adults, the “reverse” colour of the coat is to be considered a **NORMAL** coat colour change. At the root it may appear that the primary smoke colour turns white a short distance up the hair shaft and then reverts back to the primary colour. The tipping during this coat colour phase may consume most of the hair shaft with only minimal white colour deep in the coat.

BLACK SMOKE

Coat: White undercoat, deeply tipped with black. Cat in repose appears black. In motion the white undercoat is apparent. Face, legs and tail, black with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Black.

Paw Pads: Black.

CAMEO SMOKE (RED SMOKE)

Coat: White undercoat, deeply tipped with red. Cat in repose appears red. In motion the white undercoat is apparent. Face, legs and tail, red with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Rose.

Paw Pads: Rose.

CHOCOLATE SMOKE

Coat: White undercoat, deeply tipped with chocolate. Cat in repose appears chocolate. In motion the white undercoat is apparent. Face, legs and tail, chocolate with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Brown.

Paw Pads: Cinnamon-Pink.

CREAM CAMEO SMOKE

Coat: White undercoat, deeply tipped with cream. Cat in repose appears cream. In motion the white undercoat is apparent. Face, legs and tail, cream with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Pink.

Paw Pads: Pink.

LILAC SMOKE

Coat: White undercoat, deeply tipped with lilac. Cat in repose appears lilac. In motion the white undercoat is apparent. Face, legs and tail, lilac with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Lavender.

Paw Pads: Pink.

Nose Leather: Seal brown, may be mottled with pink.

Paw Pads: Seal brown, may be mottled with pink.

Eye Colour: Clear brilliant blue. Deep blue preferred.

Objections: Improper colour nose or paw leathers. Stripes or mottling on body, but consideration is to be given to shading in older cats.

SMOKE POINT

Conforms to the pointed pattern. White undercoat, deeply tipped with colour consistent with the corresponding base colour (solid point, tortie point, pointed bi-colour, pointed van). Points and mask appear solidly coloured with narrow band of white at base of hairs next to skin, which may be seen only when fur is parted. Nose leather and paw pad colours appropriate to the base colour.

SHADED POINT will be lighter in colour than smoke point.

CHINCHILLA POINT will be lighter in colour than shaded point.

SILVER LYNX POINT

White undercoat, deeply tipped with colour consistent with the corresponding base colour and tabby markings. (Silver lynx point, silver tortie lynx point, silver lynx point bi-colour, silver tortie lynx point bi-colour, silver lynx point van, silver tortie lynx point van). Points and mask appear as a normal lynx point or tortie lynx point with narrow band of white at base of hairs next to skin, which may be seen only when fur is parted. Nose leather and paw pad colours appropriate to the base colour.

GOLDEN LYNX POINT

Pale warm honey undercoat, deeply tipped with colour consistent with the corresponding base colour and tabby markings. (golden lynx point, golden tortie lynx point, golden lynx point bi-colour, golden tortie lynx point bi-colour, golden lynx point van, golden tortie lynx point van). Points and mask appear as a normal lynx point or tortie lynx point with narrow band of warm honey at base of hairs next to skin, which may be seen only when fur is parted. Nose leather and paw pad colours appropriate to the base colour.

POINTED WITH WHITE

Pointed with White should conform to the pointed pattern with the addition of white overlaid. The face and the body should exhibit substantial white (a minimum of one-third is preferred). There must be some white on the face with enough white to indicate an inverted ‘V’ being preferred. Small to medium spots of colour are allowed within the white, both on the face and on the body. Blue eye colour. Disqualify no white on face.

POINTED VAN

Pointed Van should conform to the pointed pattern with the face and the body exhibiting substantial white (a minimum of one-third is preferred). Point colour is confined to the head and tail with some allowance of point colour on the legs. There must be enough white on the face to differentiate the Van pattern from an inverted ‘V’ of a bi-colour. One or two small spots of colour are allowed within the white, both on the face and on the body. Blue eye colour. Disqualify no white on face.

GENERAL PREFACE

The following shall apply to all breeds or as indicated:

WITHHOLD AWARDS FOR:

1. More or fewer than five toes on each front paw and four toes on each back paw (Pixie-Bobs are exempt from this rule). Splayed toes are an objection.
2. White lockets, buttons or toes on any cat, except where part of the natural colour / pattern OR unless otherwise specified in the breed standard.
3. Any deformity or disfigurement — hereditary, congenital or acquired.
4. Entries which do not meet correct markings as stated. Entries must be properly and distinctly marked in accordance with the standard for all cats of the tabby variety.
5. A cat showing evidence of intent to deceive (i.e., the presence of powder, or chalk remaining in the coat after normal grooming, the use of tints, colour rinses or other artificial colouring concealment media, sanding or shaving, or knowledge of cosmetic surgery).
6. Any cat not amenable to handling by the judge, its owner or agent. All domestic breeds of cats covered in the standards are expected to be gentle and amenable to handling. Cats should be well-balanced physically and temperamentally.
7. Kinks, visible or invisible. Kink is defined as rigid deflection in the line of the tail, visible or otherwise. Small, invisible bumps shall be considered a fault.
8. Wrong eye colour (unless otherwise specified).
9. Crossed eyes in any breed.
10. Maloccluded jaws.
11. Monorchidism (absence of one testicle) or Cryptorchidism (absence of both testicles) are grounds for withholding awards.
12. Any entry that scores less than 90 points.

KEEP IN MIND THE FOLLOWING:

1. weak, receding, or protruding chin is to be considered a serious fault. Deductions can be made for chin, profile and balance.
2. Allowance is to be made for stud jowls in males. Usually, males are proportionally larger than females.
3. Allowance is to be made for seasonal variations in coat.
4. Allowance is to be made for faint tabby markings, except where part of the normal colour pattern.
5. Allowance is to be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.

6. A 'blaze' — two colours on the face divided down the nose— is desirable (all other factors being equal) on the numerous tortoiseshell-like colours and patterns (i.e., tortoiseshell, lilac-cream, champagne-tortie, seal tortie point, etc.)
7. The greenish-yellow eye colour, generally referred to as 'hazel' (not brown) is allowed where stated.
8. Excellence in one aspect of the standard shall not offset deficiency in another. Inasmuch as the standard specifically describes the various parts of the cat's appearance, all judges shall conduct their work in accordance with these specifications.
9. All entries should possess the appropriate weight, condition and balance for its respective breed. Balance is the overall physical picture of the cat. The cat must 'fit together' and any one particular quality must not be emphasized. Judges shall not penalize any fault by a greater amount than the cat would have earned if perfect in that detail.
10. Judges shall penalize for bad condition indicating illness or poor care.
11. Natural lighting should be used wherever possible. Allowances are to be made for (harsh) artificial lighting which may distort eye and coat colour.
