

HIMALAYAN

POINTED HIMALAYANS AND NON-POINTED HIMALAYANS ARE JUDGED AS TWO SEPARATE BREEDS.

This attractive man-made breed was originally synthesized as a deliberate programme to establish a Siamese-patterned cat with both Persian coat and Persian body type. From 1970, in order to improve body type, backcrosses to Persians were allowed. The typical Non-Pointed Himalayans ("hybrids" as they were called) were often as good as the best Persians. Hybrids to hybrid matings are a sure way to improve Himalayan body and head

I – BODY/CONFORMATION (25)

(10) BODY – Medium to large. Heavily boned. Cobby, low on legs and deep in chest. Equally massive across shoulders and rump. Well rounded mid-section. Level back.

(5) LEGS – Short thick and strong. Forelegs straight. Boning to range from medium to heavy.

(5) FEET – Large and round. Toes carried close together.

(5) TAIL – Short, thick and in proportion to body.

II – HEAD TYPE (30)

(20) HEAD – (5 Full Face) – Round and massive with great breadth in skull. Well rounded underlying bone structure. Forehead slightly rounded. Short thick neck. PROFILE – the head gives the appearance of the capital letter "B".

(5 Nose) – Short and broad. A deep break between the eyes. (5 Cheeks) – Full, broad but continues the rounded contours of head. (5 Chin) – Full and well developed.

(5) EARS – Small and rounded. Tilted forward slightly and not open unduly at base. Set wide apart and set low on the head fitting into the rounded contours of the head.

(5) EYES – Large, round and set far apart. Eyes free from any matter or discharge. When viewing the Himalayan face on, one should see a sweet, open expression.

III – COAT TEXTURE/LENGTH (10)

Long, soft, glossy, thick and stands off from body. Ear tufts long and curved. Toe tufts long. Full tail plume.

IV – COLOUR (25)

POINTED COLOURS

(10) BODY COLOUR – Even, free from barring. Definite contrast between body colour and point colour. Allowance is to be made for darker body shading in older cats. Belly spots are allowed by preference given to cats which lack such spots.

(10) POINT COLOUR – Mask, ears, legs, feet and tail are dense in colour and clearly defined. Points matched and free of barring (except in Lynx Points). Mask covers entire face, including whisker pads. The mask connects with the

ears by tracings. Allowance should be made for an incomplete mask in kittens.

(5) EYE COLOUR – Deep, brilliant blue. Preference is given to depth of colour.

NON-POINTED COLOURS

(20) COLOUR – In cats with special markings. 10 points are allotted for colour and 10 points for markings.

(5) EYE COLOUR – Conforms with coat colour. Preference is given for depth, evenness and brilliance of colour.

V – CONDITION & BALANCE (10)

Firm without being fat.

OBJECTIONS

| | DEDUCT |
|------------------------------------|---------------|
| * Mismatched colour points | 1-5 |
| * Incomplete mask.(Colourpoints) | 1-5 |
| * Ticking in points (Colourpoints) | 1-3 |
| * Weak eye colour | 1-5 |

WITHHOLDS

- * Miniature size.
- * Extreme nose break which causes chronic sniffles or excessive eye discharge.
- * All grounds for withholding awards as listed in the General Preface.

RECOGNIZED COLOURS

Refer to Colours & Patterns appendix for complete list.

Applicable to all recognized colours/patterns of POINTED Himalayan (Solid Point, Tortie Point)

Point Colour: Points and mask exhibit a mantle of tipping consistent with the point colour, shading from darker on the extremity of the hair tip to warm beige at the base of the mask, legs and tail

Coat: Warm beige undercoat may be tipped with the corresponding coat colour.

Nose Leather: Corresponds with point coat colour.

Paw Pads: Corresponds with point coat colour.

Eye Colour: Clear brilliant blue. Deep blue preferred.

SILVER LYNX POINT

Applicable to all recognized colours/patterns of LYNX POINTED Himalayan (Lynx Point, Tortie Lynx Point).

Point Colour: A narrow band of white appears at the base of the hairs next to the skin which may be seen only when fur is parted at the base of the mask, legs and tail.

Coat: White undercoat may be tipped with the corresponding coat colour.

Nose Leather: Corresponds with point coat colour.

Paw Pads: Corresponds with point coat colour.

Eye Colour: Clear brilliant blue. Deep blue preferred.

GOLDEN LYNX POINT

Applicable to all recognized colours/patterns of LYNX POINTED Himalayan (Lynx Point, Tortie Lynx Point).

Point Colour: A narrow band of warm beige appears at the base of the hairs next to the skin which may be seen only when fur is parted at the base of the mask, legs and tail.

Coat: Warm beige undercoat may be tipped with the corresponding coat colour.

Nose Leather: Corresponds with point coat colour.

Paw Pads: Corresponds with point coat colour.

Eye Colour: Clear brilliant blue. Deep blue preferred.

GENERAL PREFACE

It is important to consult the individual breed standard for breed-specific disqualifications. The following list applies to all breeds unless otherwise indicated.

WITHHOLD AWARDS (W/A) FOR:

- More or fewer than five toes on each front paw and four toes on each back paw. Pixie-Bobs are exempt from this disqualification.
- White lockets, buttons, or toes on any cat, except where part of the natural colour or pattern, or unless otherwise specified in the breed standard.
- Any entry that is declawed. Clear nail-tip covers are allowed.
- Any deformity or disfigurement — hereditary, congenital, or acquired. Household Pet entries are exempt from this disqualification.
- A cat showing evidence of intent to deceive (e.g., the presence of powder or chalk residue in the coat after normal grooming; the use of tints, colour rinses, or other artificial colouring concealment media; sanding or shaving).
- An entry, without provocation, attacks a judge or other person within the ring area, the entry shall be deemed vicious and disqualified (D.V. Disqualified, Vicious).
- Kinks, visible or invisible. Kink is defined as a rigid deflection of the tail line, whether visible or not. Small, invisible bumps or calcium deposits shall be considered a fault. Refer to individual breed standards for exceptions to this rule.
- Wrong eye colour (unless otherwise specified in a breed's standard).
- Crossed eyes in any breed. Household Pet entries are exempt from this disqualification.
- Maloccluded jaws.
- Monorchidism (the absence of one testicle) or cryptorchidism (the absence of both testicles) is grounds for withholding awards in the Championship (whole adult) or Miscellaneous (whole adult) classes.
- Any entry that scores less than 90 points.
- Excellence in one aspect of the standard shall not offset a deficiency in another. Because the standard specifically describes the various parts of the cat's appearance, all judges shall conduct their judging in accordance with these specifications.
- All entries should possess the appropriate weight, condition, and balance for their breed. Balance is the overall physical picture of the cat. The cat must 'fit together', and no single quality **should** be emphasized. Judges shall not penalize any fault by more than the cat would have earned if perfect in that detail.
- Judges shall penalize or disqualify N.F.A (No Further Award) for poor condition, indicating illness or poor care.
- If an entry has fleas, fungus, ear mites, etc., the judge shall N.F.A. the entry and notify the Show Manager.
- An obviously pregnant or lactating queen will be disqualified as N.F.A. (No Further Awards).
- Natural lighting should be used wherever possible. Allowances should be made for harsh artificial lighting, which may distort eye and coat colour.
- An entry presented in the judging ring showing noticeable effects of a sedative (e.g., third eyelids visible, overly glassy eyes, inability to stand or sit, lack of coordination or muscle control) shall not receive an award. The judge will record N.F.A (No Further Award) in their judge's book.
- Any cat too nervous or intractable to handle by the judge or the owner / agent must be disqualified (D.U.H. – Disqualified, Unable to Handle).
- A judge may disqualify any entry whose owner / agent draws specific attention to himself or his entry when benching the cat in the judging ring or at any time during judging. Judges shall enter D.L.E. (Disqualified, Lack of Etiquette) in their books.
- When an entry's colour or pattern has been misclassified, the entry shall be transferred to its correct class with the owner's permission.
- Cats recovering from recent surgery (or injury) where the incision (or wound) has not completely healed, stitches removed, etc.; must be disqualified (N.F.A. – No Further Awards).

FACTORS TO CONSIDER:

- A weak, receding, or protruding chin is considered a serious fault. Deductions can be made for chin, profile, and balance.
- Allowance should be made for stud jowls in males. Usually, males are proportionally larger than females.
- Allowance is to be made for seasonal variations in coat.
- Allowance should be made for faint tabby markings in kittens and young cats, except when they are part of the normal colour pattern.
- Allowance should be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.
