HIMALAYAN

POINTERED HIMALYANS AND NON-POINTED HIMALYANS ARE JUDGED AS TWO SEPARATE BREEDS.

This attractive man-made breed was originally synthesized as a deliberate programme to establish a Siamese-patterned cat with both Persian coat and Persian body type. From 1970, in order to improve body type, backcrosses to Persians were allowed. The tiestest Non-Pointed Himalayans ("hybrids" as they were called) were often as good as the best Persians. Hybrids to hybrid matings are a sure way to improve Himalayan body and head.

I – BODY/CONFORMATION (25)

(5) LEGS – Short thick and strong. Forelegs straight. Boning to range from medium to heavy.

(5) FEET – Large and round. Toes carried close together.

(5) TAIL – Short, thick and in proportion to body.

II – HEAD TYPE (30)

(20) HEAD – (5 Full Face) – Round and massive with great breadth in skull. Well rounded underlying bone structure. Forehead slightly rounded. Short thick neck. PROFILE – the head gives the appearance of the capital letter "B".

(5) Nose – Short and broad. A deep break between the eyes. (5 Cheeks) – Full, broad but continues the rounded contours of head. (5 Chin) – Full and well developed.

(5) EARS – Small and rounded. Tilted forward slightly and not open unduly at base. Set wide apart and set low on the head fitting into the rounded contours of the head.

(5) EYES – Large, round and set far apart. Eyes free from any matter or discharge. When viewing the Himalayan face on, one should see a sweet, open expression.

III – COAT TEXTURE/LENGTH (10)

Long, soft, glossy, thick and stands off from body. Ear tufts long and curved. Toe tufts long. Full tail plume.

IV – COLOUR (25)

POINTERED COLOURS

(10) BODY COLOUR – Even, free from barring. Definite contrast between body colour and point colour. Allowance is to be made for darker body shading in older cats. Belly spots are allowed by preference given to cats which lack such spots.

(10) POINT COLOUR – Mask, ears, legs, feet and tail are dense in colour and clearly defined. Points matched and free of barring (except in Lynx Points). Mask covers entire face, including whisker pads. The mask connects with the ears by tracings. Allowance should be made for an incomplete mask in kittens.

(5) EYE COLOUR – Deep, brilliant blue. Preference is given to depth of colour.

NON-POINTED COLOURS

(20) COLOUR – In cats with special markings. 10 points are allotted for colour and 10 points for markings.

(5) EYE COLOUR – Conforms with coat colour. Preference is given for depth, eveness and brilliance of colour.

V – CONDITION & BALANCE (10)

Firm without being fat.

SMOKE

GENERAL DESCRIPTION
Coat: Deeply tipped with an established colour or pattern. In repose the cat looks like the established colour or pattern. In motion the white undercoat is clearly apparent. The face, ears, legs, and tail are the established colour or pattern with a narrow band of white at the base of the hairs next to the skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose leather: Conform to the established colour standards.
Paw Pads: Conform to the established colour standards.
Eye Colour: Copper.

NOTE: During seasonal coat colour changes on both kittens and adults, the “reverse” colour of the coat is to be considered a NORMAL coat colour change. At the root it may appear that the primary smoke colour turns white a short distance up the hair shaft and then reverts back to the primary colour. The tipping during this coat colour phase may consume most of the hair shaft with only minimal white colour deep in the coat.

BLACK SMOKE
Coat: White undercoat, deeply tipped with black. Cat in repose appears black. In motion the white undercoat is apparent. Face, legs and tail, black with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Black.
Paw Pads: Black.

CAMEO SMOKE
Coat: White undercoat, deeply tipped with red. Cat in repose appears red. In motion the white undercoat is apparent. Face, legs and tail, red with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Rose.
Paw Pads: Rose.

CHOCOLATE SMOKE
Coat: White undercoat, deeply tipped with chocolate. Cat in repose appears chocolate. In motion the white undercoat is apparent. Face, legs and tail, chocolate with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Brown.
Paw Pads: Cinnamon-Pink.

CREAM CAMEO SMOKE
Coat: White undercoat, deeply tipped with cream. Cat in repose appears cream. In motion the white undercoat is apparent. Face, legs and tail, cream with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Pink.
Paw Pads: Pink.

Refer to Breed Standard and General Preface for disqualifications and objections not listed here.
LILAC SMOKE
Coat: White undercoat, deeply tipped with lilac. Cat in repose appears lilac. In motion the white undercoat is apparent. Face, legs and tail, lilac with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Lavender.
Paw Pads: Pink.

Traditional eye colour is copper. EXCEPTIONS are silver, golden, blue silver, blue golden in the Shaded and Chinchilla class where the eye colour is green to blue-green. Silver Tabby and Blue Silver Tabby — as well as the Patched Tabby version of same — may have Copper, Green, or Hazel eye colour. Odd-eyed is allowed (one eye must be blue). Please refer to the individual breed standard for additional guidance.

ANY COLOUR WITH WHITE

Coat conforms to the established colours and patterns with the addition of white. As a preferred minimum (unless otherwise stated in the breed standard), the cat should have white feet, legs, underside, chest and muzzle. An inverted ‘V’ on the face is desirable. Nose leather and paw pads conform to the established colour standards.

CALICO / DILUTE CALICO

All established colours and patterns distributed as described for the Calico pattern (a tri-colour cat with un-brindled medium to large patches of DENSE colour and red, or DILUTE colour and cream on a white background).

PATTERNED CALICO

PATTERNED CALICO
Coat: A white cat with TABBY patterned patches of established colours with patches of RED (which may or may not be tabby). As a preferred minimum (unless otherwise stated in the breed standard) the cat should have white feet, legs, underside, chest and muzzle.
Nose Leather: Pink or the established colour.
Paw Pads: Pink, or the established colour.

DILUTE PATTERNED CALICO

Nose Leather: Pink or the established colour.
Paw Pads: Pink, or the established colour.

VAN

All established colours and patterns distributed as described for the Van pattern (face and body predominantly white with colour restricted to the head and tail. One or two small spots of colour on the body are allowed).

Refer to Breed Standard and General Preface for disqualifications and objections not listed here.
GENERAL PREFACE

The following shall apply to all breeds or as indicated:

WITHHOLD AWARDS FOR:

1. More or fewer than five toes on each front paw and four toes on each back paw (Pixie-Bobs are exempt from this rule). Splayed toes are an objection.
2. White lockets, buttons or toes on any cat, except where part of the natural colour / pattern OR unless otherwise specified in the breed standard.
3. Any deformity or disfigurement — hereditary, congenital or acquired.
4. Entries which do not meet correct markings as stated. Entries must be properly and distinctly marked in accordance with the standard for all cats of the tabby variety.
5. A cat showing evidence of intent to deceive (i.e., the presence of powder, or chalk remaining in the coat after normal grooming, the use of tints, colour rinses or other artificial colouring concealment media, sanding or shaving, or knowledge of cosmetic surgery).
6. Any cat not amenable to handling by the judge, its owner or agent. All domestic breeds of cats covered in the standards are expected to be gentle and amenable to handling. Cats should be well-balanced physically and temperamentally.
7. Kinks, visible or invisible. Kink is defined as rigid deflection in the line of the tail, visible or otherwise. Small, invisible bumps shall be considered a fault.
8. Wrong eye colour (unless otherwise specified).
9. Crossed eyes in any breed.
10. Maloccluded jaws.
11. Monorchidism (absence of one testicle) or Cryptorchidism (absence of both testicles) are grounds for withholding awards.
12. Any entry that scores less than 90 points.

KEEP IN MIND THE FOLLOWING:

1. weak, receding, or protruding chin is to be considered a serious fault. Deductions can be made for chin, profile and balance.
2. Allowance is to be made for stud jowls in males. Usually, males are proportionally larger than females.
3. Allowance is to be made for seasonal variations in coat.
4. Allowance is to be made for faint tabby markings, except where part of the normal colour pattern.
5. Allowance is to be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.
6. A ‘blaze’ — two colours on the face divided down the nose—is desirable (all other factors being equal) on the numerous tortoiseshell-like colours and patterns (i.e., tortoiseshell, lilac-cream, champagne-tortie, seal tortie point, etc.)
7. The greenish-yellow eye colour, generally referred to as ‘hazel’ (not brown) is allowed where stated.
8. Excellence in one aspect of the standard shall not offset deficiency in another. Inasmuch as the standard specifically describes the various parts of the cat’s appearance, all judges shall conduct their work in accordance with these specifications.
9. All entries should possess the appropriate weight, condition and balance for its respective breed. Balance is the overall physical picture of the cat. The cat must ‘fit together’ and any one particular quality must not be emphasized. Judges shall not penalize any fault by a greater amount than the cat would have earned if perfect in that detail.
10. Judges shall penalize for bad condition indicating illness or poor care.
11. Natural lighting should be used wherever possible. Allowances are to be made for (harsh) artificial lighting which may distort eye and coat colour.
