

PETERBALD

HAIRLESS AND BRUSH COAT ARE JUDGED AS ONE BREED. Only the hairless and brush coat are recognized for championship.

The peterbald is an elegant Russian breed with a unique coat. The peterbald is a slender, muscular, medium sized cat; smaller than the american shorthair, but heavier than an oriental shorthair. The body shape is similar to the oriental shorthair, but more muscular. The lines are long and elegant. Typical of the breed is the unusual coat textures; ranging from hairless to full brush coat. The totally hairless peterbald when stroked ranges in feeling from suede or peach like to silk. The brush coat peterbald feels like a man's bristly beard.

I – BODY TYPE/CONFORMATION (30)

(10) BODY – The body is elongated and lithe with a very muscular body and tight abdomen. Muscles are supple, well developed and clearly defined. Shoulders, rib cage and hips should be the same width.

(10) LEGS & FEET – The legs are long, medium-fine boned and straight; dropping off directly under the chest ending in small oval feet with long, agile, prominent toes (monkey fingers). The paw pads should be almost completely concealed in the standing cat. Hind legs slightly longer than front legs.

(10) TAIL – The tail is very long, thin at the base, whippy and ends in a pointed tip.

II – HEAD TYPE (35)

(5) FULL FACE — Medium size in proportion to the body, well balanced. The head is a triangular wedge shape. The wedge starts at the nose and broadens on both sides in straight lines to the ears.

(5) PROFILE — Long, straight nose and flat forehead forming two distinct flat planes meeting midway at the top of the eyes. Two-planed with no nose stop or concave curvature.

(5) MUZZLE — The muzzle is strong, slightly blunt and not narrow. Smooth wedge with no whisker pinch, although whisker pads will be evident. WHISKERS if present, should be crinkly and kinky and may appear to be broken.

(5) CHIN — strong well developed chin, forming a vertical line with the tip of the nose. Not protruding.

(10) EYES — The eyes are almost almond-shaped, large and set slightly at a slant to the nose in harmony with the lines of wedge and ears. The eyes are neither protruding nor recessed. Distance between eyes is not less than width of one eye. Any colour is acceptable except in pointed cats when the eye colour is an intense blue, the darker the better.

(5) EARS — The ears are very large oversized with a broad base and pointed tips. They are wide set, with the outer edges continuing the lines of the wedge shaped head.

III – COAT / SKIN QUALITY & WRINKLES (25)

In Kittens and young adults the legs, paws, tail and muzzle may be covered with slight coat, which should be absent in adult cats older than 2 years.

WRINKLES (10) — Wrinkling should be present in both coat types and is concentrated mainly around the muzzle between the ears and around the shoulders.

HAIRLESS (15)

(5) COAT / SKIN — May be totally hairless or have only very fine, short, downy hair on the face and extremities.

(10) TEXTURE — The hairless peterbald has soft, warm, elastic skin that may range from having a texture akin to suede or peach skin or feeling like silk.

BRUSH COAT (15)

(5) COAT — Wavy, wiry hair on the whole body. Varying coat density on the head and neck ranging from peach fuzz to normal brush.

(5) LENGTH — Brush coat ranges 5mm or longer in length and should in no way feel or look like a normal coat when closely inspected.

(5) TEXTURE — Wiry-Bristly – similar to a man's beard. Brush coat ranges from a sparse wiry coat of irregular texture in which the skin is seen through the coat; to a dense, wiry, short, wavy or kinky brush coat.

IV — COLOUR (5)

(5) COLOUR — All colours and patterns are recognized. Any amount of white is permitted. Locketts and buttons are allowed.

V — CONDITION (5)

Muscular, toned body, hind legs adequately muscled, not slab sided.

WITH WHITE COMBINATIONS

Bi-Colour Combinations:

All established colours and patterns **with the addition of white** (preferred minimum the cat should have white feet, legs, undersides, chest, and muzzle—ideally an inverted 'V'). Solids, Tabbies, Patched Tabbies, Tortoiseshells.

All eye colours are allowed including Odd-eyed (one eye must be blue).

Calico Combinations:

All established colours and patterns distributed as described for the Calico pattern (a tri-colour cat with un-brindled medium to large patches of DENSE colour and red, or DILUTE colour and cream on a white background). Calico, Dilute Calico, Tabby Patterned Calico. All eye colours are allowed including Odd-eyed (one eye must be blue).

Van Combinations:

All established colours and patterns distributed as described for the Van pattern (face and body predominantly white with colour restricted to the head and tail. One or two small spots of colour on the body are allowed): Solids, Tabbies, Tortoiseshells, and all Calico patterns. All eye colours are allowed including Odd-eyed (one eye must be blue).

SEPIA and MINK

Sepia and Mink colours are recognized in all established colours and patterns including with white (bi-colour, calico, van) except Pointed or Pointed with white.

Sepia eye colour is gold or greenish-gold, and odd-eyed (one blue eye and one gold or greenish-gold eye). Sepia skin colour is paler and warmer than the equivalent of traditional colour. A slight intensification of colour on the ears, tail, feet and face is noticeable especially in kittens.

Mink eye colour is blue-green to aqua, and odd-eyed (one blue eye and one blue-green / aqua eye). Mink skin colour is much lighter than the corresponding sepia colours and develops more intense colour on the ears, tail, feet and face; than on the body.

Sepia and Mink are recognized in:

Solids, Tabbies, Patched Tabbies, Tortoiseshells. All established colours and patterns with the addition of white (bi-colour, calico, van) except Pointed or Pointed with white.

EXCEPTION: *black* (including with white), black* based tabby, patched tabby, and tortoiseshell are NOT recognized as sepia or mink.*

**The Sepia and Mink equivalent of Black is SEAL.*

TABBY PATTERNS

CLASSIC TABBY PATTERN

Markings dense, clearly defined and broad. Legs barred with bracelets. Tail evenly ringed. Necklaces on neck and upper chest are to be unbroken. Frown marks on forehead form a letter "M". Line runs back from outer corner of eye. Swirls on cheeks. Vertical lines over back of head extend to shoulder markings which are in the shape of a butterfly with both upper and lower wings distinctly outlined and marked with dots inside the outline. Back markings consist of a vertical line down the spine from butterfly to tail with a vertical stripe paralleling it on each side. Large blotch on each side to be encircled by one or more unbroken rings. Side markings should be the same on both sides. Double vertical rows of buttons on chest and stomach.

MACKEREL TABBY PATTERN

Markings dense, clearly defined. Legs barred with bracelets. Tail evenly ringed. Necklaces on neck and upper chest, are to be unbroken. Frown marks on forehead form an "M". Line runs back from outer corner of eye. Lines run down the head to meet the shoulders. Spine lines run together to form a narrow saddle. Unbroken lines run around the body vertically. Buttons on chest and stomach.

SPOTTED TABBY PATTERN

Markings dense, clearly defined. Legs barred with bracelets. Tail evenly ringed. Necklaces on neck and upper chest, are to be unbroken. Frown marks on forehead form an "M". Line runs back from outer corner of eye. Lines run down the head to meet the shoulders. Spine lines consist of a vertical line preferably composed of spots. Spots on body may vary in size and shape but should not run together (i.e. a broken Mackerel pattern). Buttons on chest and stomach.

SEAL TORTIE LYNX POINT

Point Colour: Seal brown tabby markings patched with red on a pale brown groundcolour. All points should be the same shade.

Skin Ground Colour: Even pale cream to fawn. Shadings if any are the shade of the points.

Pattern: The mask must be clearly marked with typical tabby markings including a classic “M” on the forehead. Eyes are outlined in dark pigment. Inner ear is light and a thumb print appears on the outer ear. Stripes on the legs and tail.

Nose Leather: Seal brown, may be mottled with pink.

Paw Pads: Seal brown, may be mottled with pink.

Eye Colour: Clear brilliant blue. Deep blue preferred.

POINTED BI-COLOURS

Applicable to all recognized colours/patterns of POINTED BI-COLOUR Sphynx (Solid Point, Tortie Point, Lynx Point, Tortie Lynx Point patterns)

POINTED WITH WHITE

Pointed with White should conform to the pointed pattern with the addition of white overlaid. The face and the body should exhibit substantial white (a minimum of one-third is preferred). There must be some white on the face with enough white to indicate an inverted ‘V’ being preferred. Small to medium spots of colour are allowed within the white, both on the face and on the body. Disqualify no white on face.

Nose Leather: Pink and/or the corresponding point coat colour.

Paw Pads: Pink and/or the corresponding point coat colour.

Eye Colour: Clear brilliant blue. Deep blue preferred.

POINTED VAN

Pointed Van should conform to the pointed pattern with the face and the body exhibiting substantial white (a minimum of one-third is preferred). Point colour is confined to the head and tail with some allowance of point colour on the legs. There must be enough white on the face to differentiate the Van pattern from an inverted ‘V’ of a bi-colour. One or two small spots of colour are allowed within the white, both on the face and on the body. Disqualify no white on face.

Nose Leather: Pink and/or the corresponding point coat colour.

Paw Pads: Pink and/or the corresponding point coat colour.

Eye Colour: Clear brilliant blue. Deep blue preferred.

GENERAL PREFACE

The following shall apply to all breeds or as indicated:

WITHHOLD AWARDS FOR:

1. More or fewer than five toes on each front paw and four toes on each back paw (Pixie-Bobs are exempt from this rule). Splayed toes are an objection.
2. White lockets, buttons or toes on any cat, except where part of the natural colour / pattern OR unless otherwise specified in the breed standard.
3. Any deformity or disfigurement — hereditary, congenital or acquired.
4. Entries which do not meet correct markings as stated. Entries must be properly and distinctly marked in accordance with the standard for all cats of the tabby variety.
5. A cat showing evidence of intent to deceive (i.e., the presence of powder, or chalk remaining in the coat after normal grooming, the use of tints, colour rinses or other artificial colouring concealment media, sanding or shaving, or knowledge of cosmetic surgery).
6. Any cat not amenable to handling by the judge, its owner or agent. All domestic breeds of cats covered in the standards are expected to be gentle and amenable to handling. Cats should be well-balanced physically and temperamentally.
7. Kinks, visible or invisible. Kink is defined as rigid deflection in the line of the tail, visible or otherwise. Small, invisible bumps shall be considered a fault.
8. Wrong eye colour (unless otherwise specified).
9. Crossed eyes in any breed.
10. Maloccluded jaws.
11. Monorchidism (absence of one testicle) or Cryptorchidism (absence of both testicles) are grounds for withholding awards.
12. Any entry that scores less than 90 points.

KEEP IN MIND THE FOLLOWING:

1. weak, receding, or protruding chin is to be considered a serious fault. Deductions can be made for chin, profile and balance.
2. Allowance is to be made for stud jowls in males. Usually, males are proportionally larger than females.
3. Allowance is to be made for seasonal variations in coat.
4. Allowance is to be made for faint tabby markings, except where part of the normal colour pattern.
5. Allowance is to be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.

6. A 'blaze' — two colours on the face divided down the nose— is desirable (all other factors being equal) on the numerous tortoiseshell-like colours and patterns (i.e., tortoiseshell, lilac-cream, champagne-tortie, seal tortie point, etc.)
7. The greenish-yellow eye colour, generally referred to as 'hazel' (not brown) is allowed where stated.
8. Excellence in one aspect of the standard shall not offset deficiency in another. Inasmuch as the standard specifically describes the various parts of the cat's appearance, all judges shall conduct their work in accordance with these specifications.
9. All entries should possess the appropriate weight, condition and balance for its respective breed. Balance is the overall physical picture of the cat. The cat must 'fit together' and any one particular quality must not be emphasized. Judges shall not penalize any fault by a greater amount than the cat would have earned if perfect in that detail.
10. Judges shall penalize for bad condition indicating illness or poor care.
11. Natural lighting should be used wherever possible. Allowances are to be made for (harsh) artificial lighting which may distort eye and coat colour.
