**SCOTTISH**

Scottish FOLD and Scottish STRAIGHT are judged as SEPARATE BREEDS. LONGHAIRS and SHORTHAIRS (Folds or Straights) are also judged as SEPARATE BREEDS.

The original Scottish was the result of a mutation in a colony of farm cats with folded ears found in Scotland. The breed has been further established through breeding with American and British Shorthairs.

**I – BODY/CONFORMATION (30)**

(20) BODY – The body is medium, rounded and even from the shoulder to the pelvic girdle. The cat stands firm with a well-padded body. There must be no hint of thickness or lack of mobility in the cat due to short, coarse legs. The toes must be neat and well rounded. The overall appearance is that of a well founded cat of medium boning.

(10) TAIL – The tail is medium to long but is in proportion with the body. The tail to be FLEXIBLE and tapering. A long, tapering tail is preferred.

**II – HEAD TYPE (40)**

(10) FULL FACE – The face is well rounded with a firm chin and jaw. The muzzle has well rounded whisker pads. The head blends into a short neck. Males have prominent cheeks which gives a jowly appearance.

(5) PROFILE – The nose is short with a gentle inward curve. A brief stop is permitted but a definite nose break is considered a fault. The profile is moderate in appearance.

(15) EARS (Folded) – Ears fold forward and downward. Small, tightly folded ears are preferred over loosely folded, larger ears. The ears are set in a cap-like fashion so as to expose a rounded cranium. Ear tips are rounded.

(15) EARS (Straight) – Medium to small, set low on the head. Ear tips are rounded.

(10) EYES – Eyes are wide open giving a sweet expression. They are large, well rounded and separated by a broad nose.

**III – COAT TEXTURE/LENGTH (10)**

SHORTHAIR – Short, dense and resilient.

LONGHAIR – Medium-long hair. Full coat on face and body desirable, but short hair permissible on face and legs. Britches, tail plume, toe tufts and ear furnishings should be clearly visible with a ruff being desirable.

**IV – COLOUR (15)**

(10) COAT COLOUR – The points for colour to be distributed as follows: 5 points for colour and 5 points for lustre and body.

(5) EYE COLOUR – Preference is given for brilliance, depth and evenness of colour. Eye colour is to correspond with coat colour.

**V – CONDITION & BALANCE (5)**

The ideal Scottish is sturdy, medium in proportion with a well padded body. The appearance of an alert healthy cat is essential. Excellence in one aspect does not offset deficiency in another. The balanced cat will show a harmony of line throughout.

**WITHHOLDS**

* Abnormally short tail.
* Tail lacking in flexibility due to fused or abnormally thick vertebrae.
* Short, coarse legs due to abnormal calcium deposits between the knees and heels.
* Unusually large feet due to extra cartilage in toes.
* All grounds for withholding awards listed in General Preface.

**RECOGNIZED COLOURS**

Refer to Colours & Patterns appendix for complete list.

---

**BREED ORIGIN:** Mutation

**REGISTRATION REQUIREMENT:** F1 allowed

**SHOWING REQUIREMENTS:** F1 allowed

**ALLOWED ANCESTRY:**

- Scottish Fold (LH & SH)
- Scottish Straight (LH & SH)
- American Shorthair
- British (SH & LH)

**ALLOWED MATINGS:**

- Scottish Fold (LH & SH) bred to Scottish Straight (LH & SH), British (LH & SH), American Shorthair.
- Scottish Straight (LH & SH) bred to Scottish Straight (LH & SH), Scottish Fold (LH & SH), British (LH & SH), American Shorthair.

Note: Scottish kittens which develop ‘temporarily’ folded ears at an early age (3 to 4 weeks of age) but straighten as they mature must be registered as Scottish FOLDS since the kittens carry the gene responsible for folding ears.

Kittens from matings out of Scottish STRAIGHT bred to Scottish Straight, British SH/LH and American SH would be registered as Scottish Straight.

SMOKE

GENERAL DESCRIPTION
Coat: Deeply tipped with an established colour or pattern. In repose the cat looks like the established colour or pattern. In motion the white undercoat is clearly apparent. The face, ears, legs, and tail are the established colour or pattern with a narrow band of white at the base of the hairs next to the skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Conform to the established colour standards.
Paw Pads: Conform to the established colour standards.

NOTE: During seasonal coat colour changes on both kittens and adults, the “reverse” colour of the coat is to be considered a NORMAL coat colour change. At the root it may appear that the primary smoke colour turns white a short distance up the hair shaft and then reverts back to the primary colour. The tipping during this coat colour phase may consume most of the hair shaft with only minimal white colour deep in the coat.

BLACK SMOKE
Coat: White undercoat, deeply tipped with black. Cat in repose appears black. In motion the white undercoat is apparent. Face, legs and tail, black with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Black.
Paw Pads: Black.

BLUE SMOKE
Coat: White undercoat, deeply tipped with blue. Cat in repose appears blue. In motion the white undercoat is apparent. Face, legs and tail, black with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Blue or rose.
Paw Pads: Blue.

Refer to Breed Standard and General Preface for disqualifications and objections not listed here.
CAMEO SMOKE
Coat: White undercoat, deeply tipped with red. Cat in repose appears red. In motion the white undercoat is apparent. Face, legs and tail, red with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Rose.
Paw Pads: Rose.

CHOCOLATE SMOKE
Coat: White undercoat, deeply tipped with chocolate. Cat in repose appears chocolate. In motion the white undercoat is apparent. Face, legs and tail, chocolate with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Brown.
Paw Pads: Cinnamon-Pink.

CINNAMON SMOKE
Coat: White undercoat, deeply tipped with cinnamon. Cat in repose appears cinnamon. White on the chin, stomach and chest, and under the tail. Legs to be the same tone as face. Shaded cats are darker than Chinchillas or Shells. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Tan to Pinkish Beige.
Paw Pads: Tan to Pinkish Beige.

CREAM CAMEO SMOKE
Coat: White undercoat, deeply tipped with cream. Cat in repose appears cream. In motion the white undercoat is apparent. Face, legs and tail, cream with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.
Nose Leather: Pink.
Paw Pads: Pink.

FAWN SMOKE
Coat: White undercoat, deeply tipped with lavender. Cat in repose appears lavender with pale cocoa overtones. White on the chin, stomach and chest, and under the tail. **TABBY PATTERNS**

**CLASSIC TABBY PATTERN**
Markings dense, clearly defined and broad. Legs barred with bracelets. Tail evenly ringed ending in a dark tip. Necklaces on neck and upper chest are to be unbroken. Frown marks on forehead form a letter “M”. Unbroken line runs back from outer corner of eye. Swirls on cheeks. Vertical lines over back of head extend to shoulder markings which are in the shape of a butterfly with both upper and lower wings distinctly outlined and marked with dots inside the outline. Back markings consist of a vertical line down the spine from butterfly to tail with a vertical stripe paralleling it on each side. Large solid blotch on each side to be encircled by one or more unbroken rings. Side markings should be the same on both sides. Double vertical rows of buttons on chest and stomach. Hocks to be same colour as markings.

Nose leather and paw pad colours appropriate to the base colour.

GOLDEN LYNX POINT
Pale warm honey undercoat, deeply tipped with colour consistent with the corresponding base colour and tabby markings. (golden lynx point, golden tortie lynx point, golden lynx point bi-colour, golden tortie lynx point bi-colour, golden lynx point van, golden tortie lynx point van). Points and mask appear as a normal lynx point or tortie lynx point with narrow band of warm honey at base of hairs next to skin, which may be seen only when fur is parted. Nose leather and paw pad colours appropriate to the base colour.

POINTED WITH WHITE
Pointed with White should conform to the pointed pattern with the addition of white overlaid. The face and the body should exhibit substantial white (a minimum of one-third is preferred). There must be some white on the face with enough white to indicate an inverted ‘V’ being preferred. Small to medium spots of colour are allowed within the white, both on the face and on the body. Blue eye colour. Disqualify no white on face.

POINTED VAN
Pointed Van should conform to the pointed pattern with the face and the body exhibiting substantial white (a minimum of one-third is preferred). Point colour is confined to the head and tail with some allowance of point colour on the legs. There must be enough white on the face to differentiate the Van pattern from an inverted ‘V’ of a bi-colour. One or two small spots of colour are allowed within the white, both on the face and on the body. Blue eye colour. Disqualify no white on face.

Refer to Breed Standard and General Preface for disqualifications and objections not listed here.
GENERAL PREFACE

The following shall apply to all breeds or as indicated:

WITHHOLD AWARDS FOR:

1. More or fewer than five toes on each front paw and four toes on each back paw (Pixie-Bobs are exempt from this rule). Splayed toes are an objection.
2. White lockets, buttons or toes on any cat, except where part of the natural colour/pattern OR unless otherwise specified in the breed standard.
3. Any deformity or disfigurement — hereditary, congenital or acquired.
4. Entries which do not meet correct markings as stated. Entries must be properly and distinctly marked in accordance with the standard for all cats of the tabby variety.
5. A cat showing evidence of intent to deceive (i.e., the presence of powder, or chalk remaining in the coat after normal grooming, the use of tints, colour rinses or other artificial colouring concealment media, sanding or shaving, or knowledge of cosmetic surgery).
6. Any cat not amenable to handling by the judge, its owner or agent. All domestic breeds of cats covered in the standards are expected to be gentle and amenable to handling. Cats should be well-balanced physically and temperamentally.
7. Kinks, visible or invisible. Kink is defined as rigid deflection in the line of the tail, visible or otherwise. Small, invisible bumps shall be considered a fault.
8. Wrong eye colour (unless otherwise specified).
9. Crossed eyes in any breed.
10. Maloccluded jaws.
11. Monorchidism (absence of one testicle) or Cryptorchidism (absence of both testicles) are grounds for withholding awards.
12. Any entry that scores less than 90 points.

KEEP IN MIND THE FOLLOWING:

1. weak, receding, or protruding chin is to be considered a serious fault. Deductions can be made for chin, profile and balance.
2. Allowance is to be made for stud jowls in males. Usually, males are proportionally larger than females.
3. Allowance is to be made for seasonal variations in coat.
4. Allowance is to be made for faint tabby markings, except where part of the normal colour pattern.
5. Allowance is to be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.
6. A ‘blaze’ — two colours on the face divided down the nose— is desirable (all other factors being equal) on the numerous tortoiseshell-like colours and patterns (i.e., tortoiseshell, lilac-cream, champagne-tortie, seal tortie point, etc.)
7. The greenish-yellow eye colour, generally referred to as ‘hazel’ (not brown) is allowed where stated.
8. Excellence in one aspect of the standard shall not offset deficiency in another. Inasmuch as the standard specifically describes the various parts of the cat’s appearance, all judges shall conduct their work in accordance with these specifications.
9. All entries should possess the appropriate weight, condition and balance for its respective breed. Balance is the overall physical picture of the cat. The cat must ‘fit together’ and any one particular quality must not be emphasized. Judges shall not penalize any fault by a greater amount than the cat would have earned if perfect in that detail.
10. Judges shall penalize for bad condition indicating illness or poor care.
11. Natural lighting should be used wherever possible. Allowances are to be made for (harsh) artificial lighting which may distort eye and coat colour.
