SIBERIAN

NON-POINTED SIBERIANS AND POINTED SIBERIANS ARE JUDGED AS TWO SEPARATE BREEDS.

The Siberian, Russia’s native forest cat, first recorded appearance was around the year 1000. This is a cat with no extremes in type. Medium to medium large with surprising weight for its size. The overall appearance should be one of the strength, presence, and alertness, with a sweet facial expression. Size is secondary to type. The general impression is one of roundness and circles, rather than rectangles and triangles.

I – BODY/CONFORMATION (33)

(10) BODY – The body is medium in length and well muscled. From the shoulders the back arches slightly. The torso is barrel shaped, with firm belly and solid weight.
(5) LEGS – Medium in length, substantial boning with the hind legs slightly longer than front legs.
(3) FEET – Big and rounded with toe tufts desirable.
(5) TAIL – Medium in length and slightly shorter than the length of the body. Wide at the base, tapering slightly to a blunt tip.
(10) BONING – Substantial.

II – HEAD TYPE (45)

(15) FULL FACE – Medium to large modified wedge with rounded contours, in proportion to the body. The head is broader at the top of the skull tapering slightly to a full rounded muzzle. Cheekbones are neither prominent or high. There is a slight doming between the ears and an almost flat area on the forehead.
(3) PROFILE – The top of the head is almost flat with a gentle convex curvature from the forehead to the nose blending into a slight concave curvature before the tip of the nose.
(5) EARS – Medium-large, rounded tips, wide at the base with a slight forward tilt. Ears are set as much on the side of the head as the top of the head. Hair on back of ears is short and thin. Ear furnishings from the middle of the ear become longer and cover the base of the ear. Ear tufts are allowed.
(5) EYES – Medium to large, almost round. The outer corner is angled slightly towards the base of the ear. Eyes to be more than one eye’s width apart, open, alert, and expressive.
(4) CHIN – Well rounded but not protruding and is in line with the nose.
(10) MUZZLE – Moderately short in length, full and rounded. There is a slight muzzle curvature, but the transition between the side of the head and the muzzle is gentle and inconspicuous.
(3) NECK – Rounded, sturdy, and well muscled.

III – COAT TEXTURE/LENGTH (10)

(5) TEXTURE – Varies from coarse to soft according to colour. There is a tight undercoat in mature cats.
(5) LENGTH – Medium-long to long with a TRIPLE coat. Hair on the shoulders and lower part of the chest should be thick and slightly shorter. An abundant full collar ruff in adults. Hair may thicken to curls on the belly and britches, but a wavy coat is not characteristic. Tail is evenly and thickly furnished.

IV – COLOUR (5)

(3) COAT COLOUR – All colours/patterns and combinations are accepted with or without white. White buttons, spots and lockets are allowed. Strong colours desirable. Tarnish on Silvers is not penalized.
(2) COAT PATTERN – Clear patterns desirable.
(0) EYE COLOUR – NON-POINTED: Ranges from shades of green, gold, green-gold, or copper. White cats may have blue, green, gold, copper, odd-eyed. Cats with white may have blue or odd eyes. No relationship between eye colour and coat colour/pattern. POINTED: Must have blue eyes, including pointed with white.

V – CONDITION & BALANCE (7)

Powerful with good muscle development. Size is secondary to type. Allowance for coat and physical structure should be taken into consideration when judging kittens and young adults.

OBJECTIONS

* Straight profile 1-2
* Narrow or fox-like muzzle 1-10
* Long tail 1-5
* Delicate boning 1-10
* Lack of muscle tone 1-7
* Long body or under-weight adult 1-10
* Very long legs or very short legs 1-5
* Almond shaped eyes 1-5

WITHHOLDS

* All grounds for withholding awards as listed in the General Preface.

SMOKE

GENERAL DESCRIPTION

Coat: Deeply tipped with an established colour or pattern. In repose the cat looks like the established colour or pattern. In motion the white undercoat is clearly apparent. The face, ears, legs, and tail are the established colour or pattern with a narrow band of white at the base of the hairs next to the skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Conform to the established colour standards.

Paw Pads: Conform to the established colour standards.

NOTE: During seasonal coat colour changes on both kittens and adults, the “reverse” colour of the coat is to be considered a NORMAL coat colour change. At the root it may appear that the primary smoke colour turns white a short distance up the hair shaft and then reverts back to the primary colour. The tipping during this coat colour phase may consume most of the hair shaft with only minimal white colour deep in the coat.

BLACK SMOKE

Coat: White undercoat, deeply tipped with black. Cat in repose appears black. In motion the white undercoat is apparent. Face, legs and tail, black with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Black.

Paw Pads: Black.

BLUE SMOKE

Coat: White undercoat, deeply tipped with blue. Cat in repose appears blue. In motion the white undercoat is apparent. Face, legs and tail, black with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Blue or rose.

Paw Pads: Blue.

CAMEO SMOKE

Coat: White undercoat, deeply tipped with red. Cat in repose appears red. In motion the white undercoat is apparent. Face, legs and tail, red with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Rose.

Paw Pads: Rose.

CHOCOLATE SMOKE

Coat: White undercoat, deeply tipped with chocolate. Cat in repose appears chocolate. In motion the white undercoat is apparent. Face, legs and tail, chocolate with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Brown.

Paw Pads: Cinnamon-Pink.

CINNAMON SMOKE

Coat: White undercoat, deeply tipped with cinnamon. Cat in repose appears cinnamon. White on the chin, stomach and chest, and under the tail. Legs to be the same tone as face. Shaded cats are darker than Chinchillas or Shells. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Tan to Pinkish Beige.

Paw Pads: Tan to Pinkish Beige.

CREAM CAMEO SMOKE

Coat: White undercoat, deeply tipped with cream. Cat in repose appears cream. In motion the white undercoat is apparent. Face, legs and tail, cream with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Pink.

Paw Pads: Pink.

FAWN SMOKE

Coat: White undercoat, deeply tipped with lavender. Cat in repose appears lavender with pale cocoa overtones. White on the chin, stomach and chest, and under the tail. Legs to be the same tone as face. Shaded cats are darker than Chinchillas or Shells. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Pink.

Paw Pads: Pink.

LILAC SMOKE

Coat: White undercoat, deeply tipped with lilac. Cat in repose appears lilac. In motion the white undercoat is apparent. Face, legs and tail, lilac with a narrow band of white at the base of hairs next to skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose Leather: Lavender.

Paw Pads: Pink.

**TABBY PATTERNS**

**CLASSIC TABBY PATTERN**
Markings dense, clearly defined and broad. Legs barred with bracelets. Tail evenly ringed ending in a dark tip. Necklaces on neck and upper chest are to be unbroken. Frown marks on forehead form a letter “M”. Unbroken line runs back from outer corner of eye. Swirls on cheeks. Vertical lines over back of head extend to shoulder markings which are in the shape of a butterfly with both upper and lower wings distinctly outlined and marked with dots inside the outline. Back markings consist of a vertical line down the spine from butterfly to tail with a vertical stripe paralleling it on each side. Large solid blotch on each side to be encircled by one or more unbroken rings. Side markings should be the same on both sides. Double vertical rows of buttons on chest and stomach. Hocks to be same colour as markings.

**MACKEREL TABBY PATTERN**
Markings dense, clearly defined. Legs barred with bracelets. Tail evenly ringed ending with a dark tip. Necklaces on neck and upper chest, are to be unbroken. Frown marks on forehead form an “M”. Unbroken line runs back from outer corner of eye. Lines run down the head to meet the shoulders. Spine lines run together to form a narrow saddle. Unbroken lines run around the body vertically. Buttons on chest and stomach. Hocks to be same colour as markings.

**SPOTTED TABBY PATTERN**
Markings dense, clearly defined. Legs barred with bracelets. Tail spotted or broken rings ending with a dark tip. Necklaces on neck and upper chest, are to be broken. Frown marks on forehead form an “M”. Line runs back from outer corner of eye. Broken lines run down the head to meet the shoulders. Spine lines consist of broken vertical lines preferably composed of spots. Spots on body may vary in size and shape but should not run together (i.e. a broken Mackerel pattern). Buttons on chest and stomach. Hocks to be same colour as markings.

**TICKED TABBY PATTERN**
Body hair to be ticked with shades of the marking colour and ground colour. Legs barred with bracelets. Tail evenly ringed. Must have at least one necklace. Frown marks on forehead form an “M”. Line runs back from outer corner of eye. Spine line consists of darker dorsal shading. Body colour should be free of noticeable spots, stripes, or blotches. Lighter underside may show buttons on chest and stomach.

**PATCHED TABBY PATTERN**

CORIN SILVER TABBY
Coat: The base colour (i.e., black, chocolate, cinnamon, blue, lilac, fawn) is restricted to the hair tips resulting in a mantle of the base pigment colour appearing on the paw pads, and as a dark shadow across the top of the head, shoulders, flanks, and tip of the tail. The lower part of the hair shaft is white. CORIN interacts with the inhibitor trait allowing some level of bright phaeomelanin (redish-yellow) between the white band of silver and the coloured hair tip. The phaeomelanin band appears to be floating in the hair shaft. Often the silver band and the gold band are equal in amount. Expression of the gold band floating between the silver white and the coloured hair tip is preferred. Tabby markings are seen in these bands unless the pattern is Ticked. Eumelanistic colour is apparent on the dorsal (top) side of the cat and the tail including the tip; phaeomelanistic colour is strongest on the ventral side (under-side) of the cat and on the legs where eumelanistic barring may be apparent. There is a distinct white or ivory area highlighting the cheekbones and area around the muzzle, neck, and chest. Tail tip corresponds to base colour of cat.
Nose Leather: Pink with no tabby nose liner.
Paw Pads: Corresponds to base colour of cat.
Eye Colour: Preferably green, however, shades of gold, green-gold, or copper are permissible. Patterns combined with white are allowed to have blue or odd-eyes.
Allowance: Visible eumelanistic (black based) pattern in kittens which fades as the kitten ages. Homozygous CORIN Silvers have a visible golden band between the coloured hair tip and the lower part of the hair shaft which is white. Heterozygote CORIN Silvers do not have the same clear banding and may have partial nose liner.

Refer to Breed Standard and General Preface for disqualifications and objections not listed here.
CORIN GOLDEN TABBY

**Coat:** The base colour (i.e., black, chocolate, cinnamon, blue, lilac, fawn) is restricted to the hair tips resulting in a very warm, bright phaeomelanin (reddish-yellow) colour. The base pigment colour will appear on the paw pads, and then as a dark shadow across the top of the head, shoulders, flanks, and tip of the tail. Tabby markings appear in the base colour (except for Ticked Tabby). Fully mature cats may not display any tabby markings. There is a distinct white or ivory area highlighting the cheekbones and area around the muzzle, neck, and chest. Tail tip corresponds to base colour of cat.

**Nose Leather:** Pink with no tabby nose liner.

**Paw Pads:** Corresposes to base colour of cat.

**Eye Colour:** Shades of green, gold, green-gold, or copper. Patterns combined with white are allowed to have blue or odd-eyes.

**Allowance:** Visible eumelanistic (black based) pattern in kittens which fades as the kitten ages.

Traditional eye colour is copper, gold, green, or hazel. Eye colour may differ from the norm, please refer to the individual breed standard for additional guidance.

ANY COLOUR WITH WHITE

Coat conforms to the established colours and patterns with the addition of white. As a preferred minimum (unless otherwise stated in the breed standard), the cat should have white feet, legs, underside, chest and muzzle. An inverted ‘V’ on the face is desirable. Nose leather and paw pads conform to the established colour standards. Eye colour is gold to copper, blue, green, hazel, or odd-eyed (one eye must be blue). Shaded silver and white, chinchilla silver and white may also have green, blue-green, or odd-eyed where one eye is green or blue-green and the other is blue with equal colour depth.

CALICO / DILUTE CALICO

All established colours and patterns distributed as described for the Calico pattern (a tri-colour cat with un-brindled medium to large patches of DENSE colour and red, or DILUTE colour and cream on a white background). All eye colours are allowed including Odd-eyed (one eye must be blue).

PATTERNED CALICO

PATTERNED CALICO

Coat: A white cat with TABBY patterned patches of established colours with patches of RED (which may or may not be tabby). As a preferred minimum (unless otherwise stated in the breed standard) the cat should have white feet, legs, underside, chest and muzzle. Nose Leather: Pink or the established colour.
Paw Pads: Pink, or the established colour.

DILUTE PATTERNED CALICO

Coat: A white cat with TABBY patterned patches of established colours with patches of CREAM (which may or may not be tabby). As a preferred minimum (unless otherwise stated in the breed standard), the cat should have white feet, legs, underside, chest and muzzle. Nose Leather: Pink or the established colour.
Paw Pads: Pink, or the established colour.

VAN

All established colours and patterns distributed as described for the Van pattern (face and body predominantly white with colour restricted to the head and tail. One or two small spots of colour on the body are allowed): All eye colours are allowed including Odd-eyed (one eye must be blue).

Refer to Breed Standard and General Preface for disqualifications and objections not listed here.
GENERAL PREFACE

The following shall apply to all breeds or as indicated:

WITHHOLD AWARDS FOR:

1. More or fewer than five toes on each front paw and four toes on each back paw (Pixie-Bobs are exempt from this rule). Splayed toes are an objection.

2. White lockets, buttons or toes on any cat, except where part of the natural colour / pattern OR unless otherwise specified in the breed standard.

3. Any deformity or disfigurement — hereditary, congenital or acquired.

4. Entries which do not meet correct markings as stated. Entries must be properly and distinctly marked in accordance with the standard for all cats of the tabby variety.

5. A cat showing evidence of intent to deceive (i.e., the presence of powder, or chalk remaining in the coat after normal grooming, the use of tints, colour rinses or other artificial colouring concealment media, sanding or shaving, or knowledge of cosmetic surgery).

6. Any cat not amenable to handling by the judge, its owner or agent. All domestic breeds of cats covered in the standards are expected to be gentle and amenable to handling. Cats should be well-balanced physically and temperamentally.

7. Kinks, visible or invisible. Kink is defined as rigid deflection in the line of the tail, visible or otherwise. Small, invisible bumps shall be considered a fault.

8. Wrong eye colour (unless otherwise specified).

9. Crossed eyes in any breed.

10. Maloccluded jaws.

11. Monorchidism (absence of one testicle) or Cryptorchidism (absence of both testicles) are grounds for withholding awards.

12. Any entry that scores less than 90 points.

KEEP IN MIND THE FOLLOWING:

1. weak, receding, or protruding chin is to be considered a serious fault. Deductions can be made for chin, profile and balance.

2. Allowance is to be made for stud jowls in males. Usually, males are proportionally larger than females.

3. Allowance is to be made for seasonal variations in coat.

4. Allowance is to be made for faint tabby markings, except where part of the normal colour pattern.

5. Allowance is to be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.

6. A ‘blaze’ — two colours on the face divided down the nose—is desirable (all other factors being equal) on the numerous tortoiseshell-like colours and patterns (i.e., tortoiseshell, lilac-cream, champagne-tortie, seal tortie point, etc.)

7. The greenish-yellow eye colour, generally referred to as ‘hazel’ (not brown) is allowed where stated.

8. Excellence in one aspect of the standard shall not offset deficiency in another. Inasmuch as the standard specifically describes the various parts of the cat’s appearance, all judges shall conduct their work in accordance with these specifications.

9. All entries should possess the appropriate weight, condition and balance for its respective breed. Balance is the overall physical picture of the cat. The cat must ‘fit together’ and any one particular quality must not be emphasized. Judges shall not penalize any fault by a greater amount than the cat would have earned if perfect in that detail.

10. Judges shall penalize for bad condition indicating illness or poor care.

11. Natural lighting should be used wherever possible. Allowances are to be made for (harsh) artificial lighting which may distort eye and coat colour.
