

# SIBERIAN

## NON-POINTED SIBERIANS AND POINTED SIBERIANS ARE JUDGED AS TWO SEPARATE BREEDS.

The Siberian, Russia's native forest cat, first recorded appearance was around the year 1000. This is a cat with no extremes in type. Medium to medium large with surprising weight for its size. The overall appearance should be one of the strength, presence, and alertness, with a sweet facial expression. Size is secondary to type. The general impression is one of roundness and circles, rather than rectangles and triangles.

## I – BODY/CONFORMATION (33)

(10) BODY – The body is medium in length and well muscled. From the shoulders the back arches slightly. The torso is barrel shaped, with firm belly and solid weight.

(5) LEGS – Medium in length, substantial boning with the hind legs slightly longer than front legs.

(3) FEET – Big and rounded with toe tufts desirable.

(5) TAIL – Medium in length and slightly shorter than the length of the body. Wide at the base, tapering slightly to a blunt tip.

(10) BONING – Substantial.

## II – HEAD TYPE (45)

(15) FULL FACE – Medium to large modified wedge with rounded contours, in proportion to the body. The head is broader at the top of the skull tapering slightly to a full rounded muzzle. Cheekbones are neither prominent or high. There is a slight doming between the ears and an almost flat area on the forehead.

(3) PROFILE – The top of the head is almost flat with a gentle convex curvature from the forehead to the nose blending into a slight concave curvature before the tip of the nose.

(5) EARS – Medium-large, rounded tips, wide at the base with a slight forward tilt. Ears are set as much on the side of the head as the top of the head. Hair on back of ears is short and thin. Ear furnishings from the middle of the ear become longer and cover the base of the ear. Ear tufts are allowed.

(5) EYES – Medium to large, almost round. The outer corner is angled slightly towards the base of the ear. Eyes to be more than one eye's width apart, open, alert, and expressive.

(4) CHIN – Well rounded but not protruding and is in line with the nose.

(10) MUZZLE – Moderately short in length, full and rounded. There is a slight muzzle curvature, but the transition between the side of the head and the muzzle is gentle and inconspicuous.

(3) NECK – Rounded, sturdy, and well muscled.

## III – COAT TEXTURE/LENGTH (10)

(5) TEXTURE – Varies from coarse to soft according to colour. There is a tight undercoat in mature cats.

(5) LENGTH – Medium-long to long with a TRIPLE coat. Hair on the shoulders and lower part of the chest should be thick and slightly shorter. An abundant full collar ruff in adults. Hair may thicken to curls on the belly and britches, but a wavy coat is not characteristic. Tail is evenly and thickly furnished.

## IV – COLOUR (5)

(3) COAT COLOUR – All colours/patterns and combinations are accepted with or without white. White buttons, spots and lockets are allowed. Strong colours desirable.

(2) COAT PATTERN – Clear patterns desirable.

(0) EYE COLOUR – NON-POINTED: Ranges from shades of green, gold, green-gold, or copper. White cats and cats with white may have blue or odd eyes. No relationship between eye colour and coat colour/pattern. POINTED: Must have blue eyes, this includes pointed with white combinations.

## V – CONDITION & BALANCE (7)

Powerful with good muscle development. Size is secondary to type. Allowance for coat and physical structure should be taken into consideration when judging kittens and young adults.

## OBJECTIONS

	DEDUCT
* Straight profile	1-2
* Narrow or fox-like muzzle	1-10
* Long tail	1-5
* Delicate boning	1-10
* Lack of muscle tone	1-7
* Long body or under-weight adult	1-10
* Very long legs or very short legs	1-5
* Almond shaped eyes	1-5

## WITHHOLDS

- \* All grounds for withholding awards as listed in the General Preface.

## RECOGNIZED COLOURS

Refer to Colours & Patterns appendix for a complete list.

---

BREED ORIGIN:	Natural
REGISTRATION REQUIREMENTS:	No Foundation
SHOWING REQUIREMENTS:	No Foundation
ALLOWED ANCESTRY:	Siberian (pointed & traditional)
ALLOWED MATINGS:	Siberian (pointed & traditional)

---

There must be white on the face; 1/3 of the mask preferred): Solid Points, Smoke Points, Shaded Points, Golden Shaded Points, Lynx Points, Silver Lynx Points, Golden Lynx Points, Tortie Points, Tortie Smoke Points, Tortie Shaded Points, Tortie Golden Shaded Points, Tortie Lynx Points, Silver Tortie Lynx Points, Golden Tortie Lynx Points. Eye colour for the Pointed Van patterns is BLUE.

## GENERAL PREFACE

The following shall apply to all breeds or as indicated:

### WITHHOLD AWARDS FOR:

1. More or fewer than five toes on each front paw and four toes on each back paw (Pixie-Bobs are exempt from this rule). Splayed toes are an objection.
2. White lockets, buttons or toes on any cat, except where part of the natural colour / pattern OR unless otherwise specified in the breed standard.
3. Any deformity or disfigurement — hereditary, congenital or acquired.
4. Entries which do not meet correct markings as stated. Entries must be properly and distinctly marked in accordance with the standard for all cats of the tabby variety.
5. A cat showing evidence of intent to deceive (i.e., the presence of powder, or chalk remaining in the coat after normal grooming, the use of tints, colour rinses or other artificial colouring concealment media, sanding or shaving, or knowledge of cosmetic surgery).
6. Any cat not amenable to handling by the judge, its owner or agent. All domestic breeds of cats covered in the standards are expected to be gentle and amenable to handling. Cats should be well-balanced physically and temperamentally.
7. Kinks, visible or invisible. Kink is defined as rigid deflection in the line of the tail, visible or otherwise. Small, invisible bumps shall be considered a fault.
8. Wrong eye colour (unless otherwise specified).
9. Crossed eyes in any breed.
10. Maloccluded jaws.
11. Monorchidism (absence of one testicle) or Cryptorchidism (absence of both testicles) are grounds for withholding awards.
12. Any entry that scores less than 90 points.

### KEEP IN MIND THE FOLLOWING:

1. weak, receding, or protruding chin is to be considered a serious fault. Deductions can be made for chin, profile and balance.
2. Allowance is to be made for stud jowls in males. Usually, males are proportionally larger than females.
3. Allowance is to be made for seasonal variations in coat.
4. Allowance is to be made for faint tabby markings, except where part of the normal colour pattern.
5. Allowance is to be made for undeveloped eye colour and undeveloped coat colour in kittens and young cats.

6. A 'blaze' — two colours on the face divided down the nose— is desirable (all other factors being equal) on the numerous tortoiseshell-like colours and patterns (i.e., tortoiseshell, lilac-cream, champagne-tortie, seal tortie point, etc.)
7. The greenish-yellow eye colour, generally referred to as 'hazel' (not brown) is allowed where stated.
8. Excellence in one aspect of the standard shall not offset deficiency in another. Inasmuch as the standard specifically describes the various parts of the cat's appearance, all judges shall conduct their work in accordance with these specifications.
9. All entries should possess the appropriate weight, condition and balance for its respective breed. Balance is the overall physical picture of the cat. The cat must 'fit together' and any one particular quality must not be emphasized. Judges shall not penalize any fault by a greater amount than the cat would have earned if perfect in that detail.
10. Judges shall penalize for bad condition indicating illness or poor care.
11. Natural lighting should be used wherever possible. Allowances are to be made for (harsh) artificial lighting which may distort eye and coat colour.
