

TURKISH ANGORA

Turkish Angoras are a medium sized cat which is balanced and graceful. Turkish Angoras possess a fine, silky coat that shimmers with every movement, in contrast to the firm, long muscular body beneath the coat.

I – BODY/CONFORMATION (35)

(30) BODY – Medium size, however the overall balance, grace and fineness of bone are more important than actual size. Males may be slightly larger than females. Body is long and slender, possessing greater depth than width — oval rather than round (not tubular). Shoulders the same width as hips. Rump slightly higher than shoulders. Finely boned with firm musculature.

(5) LEGS & TAIL – Long legs with hind legs longer than front. Paws are small, round and dainty. Tufts between toes preferable. Tail is long and tapering from a wide base to a narrow end, with a full brush.

II – HEAD TYPE (40)

(15) FULL FACE – Small to medium in size, in balance to with the length of the body, legs, and tail. Medium long, smooth wedge. In profile the head is formed by two planes — a flat top head and the line of the nose meeting at an angle slightly above the eyes. NO BREAK. Nose medium long. Chin is firm, gently rounded, and forms a perpendicular line with nose. The muzzle is a continuation of the smooth lines of the wedge with neither pronounced whisker pad nor pinch. Neck slim, graceful and rather long.

(5) EARS (10) PLACEMENT – Large, wide at the base, pointed and tufted. Set close together, high on the head, vertical and erect.

(10) EYES – large, almond shaped, slanting slightly upwards with open expression.

III – COAT TEXTURE/LENGTH (10)

Single coated. Length of body coat varies, but tail and ruff should be long, full, finely textured and have a silk-like sheen. ‘Britches’ should be apparent on the hind legs.

IV – COLOUR (5)

(5) COAT COLOUR – All colours should be considered of equal value. Colour faults such as leg barring on shaded cats, or tabby markings on smoke cats may often be present in younger cats but will gradually fade because of the way colours develop and are expressed in this breed. White lockets and buttons should not be penalized, sound colour is preferred.

EYE COLOUR – There is no relationship between eye colour and coat colour, and each eye colour description can include much variation within its defined spectrum, especially as cats mature. Acceptable colours include: blue, green, gold (any gold or amber eye that carries a greenish cast or ring), amber (gold to copper but has NO greenish cast or ring), odd-eyed (one blue eye and the

other green, gold, or amber). While no points are specifically allocated to eye colour, deeper, richer tones are preferred. Odd-eyed cats should have similar depth of colour in both eyes.

V – CONDITION & BALANCE (10)

Proportionate in all physical aspects with a graceful, lithe appearance.

SMOKE

GENERAL DESCRIPTION

Coat: Deeply tipped with an established colour or pattern. In repose the cat looks like the established colour or pattern, In motion the white undercoat is clearly apparent. The face, ears, legs, and tail are the established colour or pattern with a narrow band of white at the base of the hairs next to the skin which may be seen only when fur is parted. Preference should be given to the cat whose coat lacks tabby markings.

Nose leather: Conform to the established colour standards.

Paw Pads: Conform to the established colour standards.

Eye Colour: See standard.

NOTE: *During seasonal coat colour changes on both kittens and adults, the “reverse” colour of the coat is to be considered a NORMAL coat colour change. At the root it may appear that the primary smoke colour turns white a short distance up the hair shaft and then reverts back to the primary colour. The tipping during this coat colour phase may consume most of the hair shaft with only minimal white colour deep in the coat*

GENERAL PREFACE

The following shall apply to all breeds or as indicated:

WITHHOLD AWARDS FOR:

1. More or fewer than five toes on each front paw and four toes on each back paw (Pixie-Bobs are exempt from this rule). Splayed toes are an objection.
2. White lockets, buttons or toes on any cat, except where part of the natural colour / pattern OR unless otherwise specified in the breed standard.
3. Any deformity or disfigurement — hereditary, congenital or acquired.
4. Entries which do not meet correct markings as stated. Entries must be properly and distinctly marked in accordance with the standard for all cats of the tabby variety.
5. A cat showing evidence of intent to deceive (i.e., the presence of powder, or chalk remaining in the coat after normal grooming, the use of tints, colour rinses or other artificial colouring concealment media, sanding or shaving, or knowledge of cosmetic surgery).
6. Any cat not amenable to handling by the judge, its owner or agent. All domestic breeds of cats covered in the standards are expected to be gentle and amenable to handling. Cats should be well-balanced physically and temperamentally.
7. Kinks, visible or invisible. Kink is defined as rigid deflection in the line of the tail, visible or otherwise. Small, invisible bumps shall be considered a fault.
8. Wrong eye colour (unless otherwise specified).
9. Crossed eyes in any breed.
10. Maloccluded jaws.
11. Monorchidism (absence of one testicle) or Cryptorchidism (absence of both testicles) are grounds for withholding awards.
12. Any entry that scores less than 90 points.

KEEP IN MIND THE FOLLOWING:

1. weak, receding, or protruding chin is to be considered a serious fault. Deductions can be made for chin, profile and balance.
2. Allowance is to be made for stud jowls in males. Usually, males are proportionally larger than females.
3. Allowance is to be made for seasonal variations in coat.
4. Allowance is to be made for faint tabby markings, except where part of the normal colour pattern.
5. Allowance is to be made for undeveloped eye colour

and undeveloped coat colour in kittens and young cats.

6. A 'blaze' — two colours on the face divided down the nose— is desirable (all other factors being equal) on the numerous tortoiseshell-like colours and patterns (i.e., tortoiseshell, lilac-cream, champagne-tortie, seal tortie point, etc.)
7. The greenish-yellow eye colour, generally referred to as 'hazel' (not brown) is allowed where stated.
8. Excellence in one aspect of the standard shall not offset deficiency in another. Inasmuch as the standard specifically describes the various parts of the cat's appearance, all judges shall conduct their work in accordance with these specifications.
9. All entries should possess the appropriate weight, condition and balance for its respective breed. Balance is the overall physical picture of the cat. The cat must 'fit together' and any one particular quality must not be emphasized. Judges shall not penalize any fault by a greater amount than the cat would have earned if perfect in that detail.
10. Judges shall penalize for bad condition indicating illness or poor care.
11. Natural lighting should be used wherever possible. Allowances are to be made for (harsh) artificial lighting which may distort eye and coat colour.
12. An entry presented in the judging ring displaying noticeable effects of a sedative (i.e., third eyelids showing, overly glassy eyes, inability to stand or sit, lack of coordination or muscle control) shall not receive an award. The judge will record NFA (No Further Award) in their judge's book.
